

Grading Multiple-Choice Questions Using the Right-Rule Method and Strategies 1.C. Student Answering Question 1: Final-Grade strategies

When a weighted average is applied to a set of numbers, more important (weight) is placed on some components of the set. One final average on this video is probably an example of a weighted average.

Consider two grading systems for determining your final class average. Each system is a weighted average of measures that include test grades, final exam grade, homework, and class participation.

Grading System 1	Grading System 2
Test average = 40%	Test average = 40%
Final exam grade = 20%	Final exam grade = 30%
Homework = 20%	Homework = 10%
Class participation = 20%	Class participation = 30%

1. If your values are the following, which grading system do you prefer? Explain.

- Test average = 88
- Final exam grade = 88
- Homework = 90
- Class participation = 90

2. If your test 1 showed higher on the final exam, how does your final-grade average change under each system?
