Annual Report of Pipeline Safety United States. Materials Transportation Bureau, **Operating Section Proceedings** American Gas Association. Operating Section,1979 *Advances in Cryogenic Engineering* K. Timmerhaus,2013-03-13

With the 1975 Cryogenic Engineering Conference this series enters the third decade of presenting the latest advances in the field of cryogenic engineering The 1975 Cryogenic Engineering Conference also marked the first time the meeting had been held outside the territorial limits of the United States Based on the enthusiastic response of the attendees and the exemplary hospitality of the Canadian hosts it certainly will not be the last meeting to convene beyond the confines of the fifty states The Cryogenic Engineering Conference Board is extremely grateful to The Royal Military College of Canada and Queen s University for the invitation to hold this meeting in Kingston Ontario Canada The assistance of A C Leonard and his staff added immeasurably in making this visit to Canada both a pleasant and a memorable one The 1975 Cryogenic Engineering Conference was the first meeting of this group on the new biennial conference schedule Since the last conference in 1973 the Western Hemisphere has experienced the impact of various energy shortages Thus it was appropriate that the theme Cryogenics Applied to Natural Resource Management for this Conference was not only timely but also an opportunity for the scientific community engaged in cryogenic activities to review the role of cryogenics in meeting these new challenges and problems facing the energy deficient nations of the world The Cryogenic Engineering Conference was also pleased to have the International Cryogenic Materials Conference join them in this meeting Buildings Energy Conservation ,1985-08 Hydrocarbons for Fuel--75 Years of Materials Research at NBS George Thomson Armstrong,1976

In this historical review the NBS work on hydrocarbons is discussed in terms of the three major classes of natural hydrocarbonaceous fuels natural gas petroleum and coal The work done on the measurement of properties of the pure components has included measurement of the values of the properties themselves and development of practical and accurate measurement procedures and instruments In addition combustion energies densities viscosities vapor pressures refractive indices elemental compositions and other parameters have been determined for complex fuel mixtures and correlated to find methods of estimating properties Extensive standard reference data tables have been compiled and a number of standard
