Geometry Labs Henri Picciotto,1999
 Geometry Labs is a book of hands on activities that use manipulatives to teach important ideas in geometry These 78 activities have enough depth to provide excellent opportunities for discussion and reflection in both middle school and high school classrooms

Glimpses into the World of Mathematics LIT Verlag,2021-01-01 Essays collected in this volume deal with various problems from the philosophy of mathematics What connects them are two questions how mathematics is created and how it is acquired In Three Worlds of Mathematics we are familiarized with David Tall s ideas pertaining to the embodied symbolic and formal worlds of mathematics In Basic Ideas of Intuitionism we focus on an epistemological approach to mathematics which is distinctive to constructive mathematics The author focuses on the computational content of intuitionistic logic and shows how it relates to functional programming The Brave Mathematical Ant carefully selects mathematical puzzles related to teaching experiences in a way that the solution requires creativity and is not obtainable by following an algorithm Moreover the solution gives us some new insight into the underlying idea Degrees Of Accessibility Of Mathematical Objects discusses various criteria which can be used to judge accessibility of mathematical objects We find logical complexity range of applications existence of a physical model as well as aesthetic values Jerzy Pogonowski Faculty of Psychology and Cognitive Sciences Adam Mickiewicz University Pozna Szymon Chlebowski Faculty of Psychology and Cognitive Sciences Adam Mickiewicz University Pozna Barbara Borkowicz Faculty of Mathematics and Computer Science Adam Mickiewicz University Pozna

Math from Three to Seven Aleksandr Kalmanovich Zvonkin,2011 This book is a captivating account of a professional mathematician s experiences conducting a math circle for preschoolers in his apartment in Moscow in the 1980s As anyone who has taught or raised young children knows mathematical education for little kids is a real mystery What are they capable of What should they learn first How hard should they work Should they even work at all

Should we push them or just let them be There are no correct answers to these questions and the author deals with them in classic math circle style he doesn't ask and then answer a question but shows us a problem be it mathematical or pedagogical and describes to us what happened His book is a narrative about what he did what he tried what worked what failed but most important what the kids experienced This book does not purport to show you how to create precocious high achievers It is just one person's story about things he tried with a half dozen young children Mathematicians psychologists educators parents and everybody interested in the intellectual development in young children will find this book to be an invaluable inspiring resource In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession Titles in this series are co-published with the Mathematical Sciences Research Institute MSRI

Jacaranda Maths Quest 7 Australian Curriculum, LearnON and Print Catherine Smith, James Smart, Lyn Elms, Geetha James, Lee Roland, Caitlin Mahony, Robert Rowland, Beverly Langsford Willing, Paula Evans, Elena Iampolsky, Anita Cann, Douglas Scott, Irene Kiroff, Kelly Wai Tse Choi, Kelly Sharp, Sonja Stambulic, Kylie Boucher, 2021-10-15 Jacaranda Maths Quest AC The Jacaranda Maths Quest Australian Curriculum series has been completely refreshed with new content deeper differentiation and even more innovative tools to enable every student to experience success ensuring no student is left behind and no student is held back Jacaranda learning experience Every student is supported to progress from Simple and Complex Familiar contexts through to Complex Unfamiliar contexts and be able to show WHAT they know plus HOW to apply it Meaningful differentiation at every stage Every student ability is catered for with access to videos for every lesson simplified theory differentiated question sets interactivities worked examples and more Upgrade to the Supercourse for even more opportunities for remediation extension and acceleration Learning analytics to support teaching Learning is made more visible with access to instant reports into student progress in formative and summative assessments including mapping results against the progression points and results by assignment Features New Powering up for Year 7 online 6 week program that is designed to plug any gaps from earlier years New teaching videos for every lesson that are flexible enough to be used for pre and post learning flipped classrooms class discussions remediation and more New teachON section with practical teaching advice including learning intentions and 3 levels of differentiated teaching programs New eWorkbook that allows teachers and students to download additional activities to support deeper learning New questions match one to one in print and online to enable multi-modal classrooms Fully worked solutions for every question demonstrate best practice and help prevent the creation of misconceptions New simplified theory and explanations and pared back chapters Even more embedded interactivities and videos to enable students to explore concepts and learn deeply New differentiated question sets at 3 levels with immediate feedback in every lesson to enable students to challenge themselves at their own level New learning intentions and success
