Animated Film and Disability Slava Greenberg, 2023-02-07 While many live action films portray disability as a spectacle, *crip animation* a genre of animated films that celebrates disabled people's lived experiences uses a variety of techniques like clay animation, puppets, pixilation and computer generated animation to represent the inner worlds of people with disabilities. *Crip animation* has the potential to challenge the ableist gaze and immerse viewers in an alternative bodily experience. In *Animated Film and Disability* Slava Greenberg analyzes over 30 animated works about disabilities including *Rocks in My Pockets*, *An Eyeful of Sound* and *A Shift in Perception*. He considers the ableism of live action cinematography, the involvement of filmmakers with disabilities in the production process and the evocation of the spectators' senses of sight and hearing consequently subverting traditional spectatorship and listenership hierarchies. In addition, Greenberg explores physical and sensory accessibility in theaters and suggests new ways to accommodate cinematic screenings. Offering an introduction to disability studies and *crip theory* for film media and animation scholars, *Animated Film and Disability* demonstrates that *crip animation* has the power to breach the spectator's comfort, evoking awareness of their own bodies and in certain cases their social privileges.

The Palgrave Handbook of the Philosophy of Film and Motion Pictures Noël Carroll, Laura T. Di Summa, Shawn Loht, 2019-10-30 This handbook brings together essays in the philosophy of film and motion pictures from authorities across the spectrum. Core areas treated include film ontology, film structure, psychology, authorship, narrative and viewer emotion. Emerging areas of interest including virtual reality, video games and nonfictional and autobiographical film also have dedicated chapters. Other areas of focus include the film medium's intersection with contemporary social issues, film's kinship to other art forms and the influence of historically seminal schools of thought in the philosophy of film. Of emphasis in many of the essays is the relationship and overlap of analytic and continental perspectives in this subject.

Whitley,2008 David Whitley's compelling study complicates our understanding of the classic Disney canon by focusing on the way images of the natural world are mediated within popular art for children He examines a range of Disney's feature animations from *Snow White* to *Finding Nemo* to show that even as the films communicate the central ideologies of their times they also express the ambiguities and tensions that underlie these dominant values *The Animated Bestiary* Paul Wells,2008-11-28 Cartoonists and animators have given animals human characteristics for so long that audiences are now accustomed to seeing Bugs Bunny singing opera and Mickey Mouse walking his dog Pluto *The Animated Bestiary* critically evaluates the depiction of animals in cartoons and animation more generally Paul Wells argues that artists use animals to engage with

issues that would be more difficult to address directly because of political religious or social taboos Consequently and principally through anthropomorphism animation uses animals to play out a performance of gender sex and sexuality racial and national traits and shifting identity often challenging how we think about ourselves Wells draws on a wide range of examples from the original King Kong to Nick Park's Chicken Run to Disney cartoons such as Tarzan The Jungle Book and Brother Bear to reflect on people by looking at the ways in which they respond to animals in cartoons and films

Race and the Animated Bodyscape Francis M. Agnoli, 2023-04-21 Race does not exist in animation it must instead be constructed and ascribed Yet over the past few years there has been growing discourse on the intersection of these two subjects within both academic and popular circles In *Race and the Animated Bodyscape: Constructing and Ascribing a Racialized Asian Identity in Avatar and Korra* author Francis M Agnoli introduces and illustrates the concept of the animated bodyscape looking specifically at the US television series *Avatar: The Last Airbender* and its sequel *The Legend of Korra* Rather than consider animated figures as unified wholes Agnoli views them as complexes of signs made up of visual aural and narrative components that complement contradict and otherwise interact with each other in the creation of meaning Every one of these components matters as they are each the result of a series of creative decisions made by various personnel across different production processes This volume re-constructs production narratives for *Avatar* and *Korra* using original and preexisting interviews with cast and crew members as well as behind the scenes material Each chapter addresses how different types of components were generated tracing their development from preliminary research to final animation In doing so this project identifies the interlocking sets of production communities behind the making of animation and thus behind the making of racialized identities Due to its illusory and constructed nature animation affords untapped opportunities to approach the topic of race in media looking beyond the role of the actor and taking into account the various factors and processes behind the production of racialized performances The analysis of race and animation calls for a holistic approach one that treats both the visual and the aural as intimately connected This volume offers a blueprint for how to approach the analysis of race and animation
