Principles of Managerial Finance Lawrence J Gitman, Roger Juchau, Jack Flanagan, 2015-05-20 Once again Principles of Managerial Finance brings you a user friendly text with strong pedagogical features and an easy to understand writing style. The new edition continues to provide a proven learning system that integrates pedagogy with concepts and practical applications making it the perfect learning tool for today's students. The book concentrates on the concepts, techniques, and practices that are needed to make key financial decisions in an increasingly competitive business environment. Not only does this text provide a strong basis for further studies of Managerial Finance but it also incorporates a personal finance perspective. The effect is that students gain a greater understanding of finance as a whole and how it affects their day to day lives. It answers the question: Why does finance matter to ME? By providing a balance of managerial and personal finance perspectives, clear exposition, comprehensive content, and a broad range of support resources, Principles of Managerial Finance will continue to be the preferred choice for many introductory finance courses. **Managerial Finance** Lawrence J. Gitman, Michael D. Joehnk, George E. Pinches, 1985. **COLLECTIVE INSTITUTIONS IN INDUSTRIALIZED NATIONS: Economic Lessons for sub-Saharan Africa** Samuel Enajero, Ph.D., 2015-12-08. Fundamental institutions are core values that originate from beliefs. Beliefs reflect on behaviors and repeated behaviors become habits. Shared habits are people's values which when ingrained become norms and customs. Societies that believed in human interdependency formed collective institutions. These institutions are compatible with modern economic prosperity. Thus, contrary to conventional economic teaching which implies that behaviors including preferences are biologically determined, all socially relevant behaviors including economic behaviors are acquired, learned, and routinized through habits. Institutions in which individuals find themselves. Again, contrary to popular beliefs that economics is about pursuit of self interest as stipulated by Adam Smith 1776, the pursuit of self interest does not translate to selfishness. For example, an entrepreneur relies on public capitals and skilled labors to succeed; a producer relies on adequate consumption to produce at capacity; a firm's profit is enhanced with higher consumer income etc. Therefore, capitalism is a function of collective institutions. Collectivism is a solution to group interdependency. People sharing the same space are interdependent and are faced with interdependency costs. Interdependency cost equals external cost plus decision making cost. Failures to eliminate or minimize external costs, externalities through collectivization of activities, result to resource misallocation. The problem of sub-Saharan Africa. Moreover, modern development theories are constructed around macroeconomic variables. Money, banking, interest rate, savings, trade, liberalization, financial assets, deficit, and debt management are modern macroeconomic development tools. These are based on aggregation of data and variables. Thus, collectivism is more pronounced in macroeconomic policies. Yet many emerging nations of sub-Saharan Africa do not find it mandatory to build all inclusive economies by mobilizing resources en masse.
