Losing Our Minds Deborah L. Ruf, 2005 Wouldn't it be a disgrace if we lost the brightest students now attending our nation's schools? Dr. Deborah L. Ruf establishes that there are far more highly gifted children than previously imagined yet large numbers of very bright children are never discovered by their schools. Using 78 gifted and highly gifted children as her examples she illustrates five levels of giftedness. Parents will be able to estimate which of the five levels of giftedness their child fits by comparing their own child's developmental milestones to those of the children described in the book. This book contains practical advice for parents including how to find a school that works for your child. Book jacket.

Cracking the AP U. S. History, 2004-2005 Tom Meltzer, 2004 The fiercer the competition to get into college the more schools require that students prove themselves in other ways than SAT scores and grade point averages. The more expensive college educations become the more students take advantage of the opportunity to test out of first-year college courses. Includes 1 sample test with full explanations for all answers. The Princeton Review's proven score-raising skills and techniques. Complete subject review of all the material likely to show up on the AP U.S. History exam.
