WINNING MASTERING APUSH: LARRY S KRIEGER, 2025-04-04 Mastering APUSH is a unique book. Instead of presenting thousands of boring facts, it focuses on key events in the histories of African Americans, Women, and Native Americans. Taken together, these three topics will generate enough questions and points to guarantee you a high APUSH score. This unique book is designed to share this WINNING strategy with APUSH students and teachers. It begins with four narrative chapters that describe key topics in African American history from the arrival of the first enslaved Africans at Jamestown to the modern Civil Rights movement. The next two chapters provide a comprehensive review of key developments in women's history from Anne Hutchinson's outspoken protest to Betty Friedan's landmark book. A final narrative chapter describes key trends in Native American history from the Columbian Exchange to the Red Power movement. Our new book does more than provide narrative chapters. It also includes a unique practice APUSH exam that contains multiple choice and free response questions on key events in the histories of African Americans, Women, and Native Americans. Taken together, these questions and the sample DBQ and LEQ essays will give you an opportunity to efficiently prepare for the APUSH exam.

The Evolution of Biological Information

Christoph Adami,2024-01-16 Why information is the unifying principle that allows us to understand the evolution of complexity in nature More than 150 years after Darwin s revolutionary On the Origin of Species we are still attempting to understand and explain the amazing complexity of life Although we now know how evolution proceeds to build complexity from simple ingredients quantifying this complexity is still a difficult undertaking In this book Christoph Adami offers a new perspective on Darwinian evolution by viewing it through the lens of information theory This novel theoretical stance sheds light on such matters as how viruses evolve drug resistance how cells evolve to communicate and how intelligence evolves By this account information emerges as the central unifying principle behind all of biology allowing us to think about the origin of life on Earth and elsewhere in a systematic manner Adami a leader in the field of computational biology first provides an accessible introduction to the information theory of biomolecules and then shows how to apply these tools to measure information stored in genetic sequences and proteins After outlining the experimental evidence of the evolution of information in both bacteria and digital organisms he describes the evolution of robustness in viruses the cooperation among cells animals and people and the evolution of brains and intelligence Building on extensive prior work in bacterial and digital evolution Adami establishes that expanding on Dobzhansky s famous remark nothing in biology makes sense except in the light of information Understanding that information is the foundation of all life he argues allows us to see beyond the particulars of our way of life to glimpse what life might be like in other worlds
