AQA Biology

Chapter 1

Answers to examination-style questions

Answers	Marks	Examiner's tips
1 (a) pathogens;	1	
(b) any 2 from: bacteria, viruses, fungi;	2	The question states organisms rather than micro-organisms so fungi is an acceptable answer, as well as some other types of organism that you do not need to know about.
(c) digestive system/gut; respiratory system/lungs;	2	There are other interfaces but these are the two you need to remember.
(d) damages cells of the host; production/release of toxins;	2	Learn these; they are important points!
2 (a) (i) because there are big differences; any correct named example, e.g. lung cancer/bronchitis much lower in women than in men;	2	Although not required in this question, it is often advisable to quote specific figures from the data as examples of differences.
(ii) easier to compare if sample size effectively the same; different numbers of people in each group;	2	The important point for the first mark is to compare .
(b) any 2 from: more stress/more saturated fats in diet/less physical activity/high blood pressure/high blood cholesterol levels/obesity;	2	As the question is not specific to lifestyle factors, other factors, such as genetics, age and sex, are valid answers.
3 (a) risk increases 3.8–4 times; evidence of correct working (e.g. $7.8/2.0$);	2	It is important to be able to use data to calculate how risk can increase or decrease.
(b) increasing cholesterol levels carries greater risk; starting smoking increases risk from 2.0% to 3%; increasing cholesterol levels from 5 to 7 increases risk from 2.0% to 5%;	3	You need to interpret data to identify risk factors and how these may change.
4 (a) enables comparison to be made; since increase in incidence with age/older people have more exposure to cigarettes;	2 max	Again the idea of comparison is essential for the first mark.
