Aqua Source Toilets:

Aqua Shock, Revised and Updated Susan J. Marks, 2011-05-12 An objective look at America's rapidly shrinking water supply. Once believed to be a problem limited to America's southwest, water shortages are now an issue coast to coast from New England to California. In *Aqua Shock: The Water Crisis in America*, author Susan J. Marks provides a comprehensive analysis of the current conflicts being waged over dwindling water supplies. She presents the findings of university studies, think tanks, and research groups, as well as the opinions of water experts including Peter Gleick, president of the Pacific Institute for Studies in Development, Environment, and Security. The book explains where our water comes from and who controls it, as well as the cost of water on cash commodities and capitalism. It describes the risks of running out of water, details how we can preserve and protect our most precious yet most undervalued natural resource, and discusses the battles over water supplies raging across the country. *Aqua Shock* is an objective look at how we arrived at this crisis point and what we can do and should be doing to solve the water crisis in America.

Planet Aqua Jeremy Rifkin, 2024-07-09 What would happen if we were to awaken one day and suddenly realize that the world we live in appeared eerily alien, as if we'd been teleported to some other distant world? That frightening prospect is now. Our planetary hydrosphere, which animates all of life on Earth, is rebelling in the wake of a global warming climate, spurring biblical spring floods, devastating summer droughts, heatwaves, and wildfires, and powerful autumn hurricanes and typhoons wreaking havoc on ecosystems and society. For too long we have misjudged the very nature of our existence and to what we owe our lifeline. We have come to believe that we live on a land planet when the reality is that we live on a water planet, and now the Earth's hydrosphere is rewilding in the throes of a changing climate, taking our species and our fellow creatures into a mass extinction event as it searches for a new equilibrium. Jeremy Rifkin calls on us to rethink our place in the universe and realize that we live on Planet Aqua. He takes us

on a new journey into the future where we will need to reassess every aspect of the way we live how we engage nature govern society conceptualize economic life educate our children and even orient ourselves in time and space The next stage in the human journey is to rebrand our home Planet Aqua and learn how to readapt to the waters of life Underpinned by robust research this major new work by one of the world's leading public intellectuals aims to redefine the very core of our existence on Planet Aqua
