“

The sun is 400 times larger than the moon but is 400 times further away from Earth, making them appear the same size.

“

A single day on Venus is longer than an entire year on Earth.

“

If you ever stepped on the moon, your footprints would remain there forever.

“

Only half a billionth of the energy released by the sun reaches Earth.

Popular Science ,1921-08 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Bureau Publication ...** ,1931 *Scientific American* ,1899 **Harper's Book of Facts** Charlton Thomas Lewis,Joseph H. Willsey,1895 *Proceedings* Indiana Academy of Science,1894 **Harper's Book of Facts** Charlton Thomas Lewis,1906 *Light* ,1893 **The Medical Times and Gazette** ,1879 *Memoirs of the College of Science and Engineering, Waseda University* Waseda University, Tokyo. Rikōgakubu,1987 **Decolonization of e-Government Research and Practice** Kelvin J. Bwalya,2018-12-01 With the rapid increase in the implementation of e Government in Africa and across the world the need to investigate the key bottlenecks issues caused by the failure of a large number of e Government projects cannot be ignored The main purpose of this book is to contribute to the current scholarly and intellectual discourse on different aspects of e Government such as understanding the critical issues in design implementation and monitoring This book specifically intends to bring out contextual issues that hugely impact on the probability for e Government failure or success It also differentiates itself by carefully exploring the issue of context awareness informed by the local context for e Government design and implementation which has not been pursued in any publication in e Government before although it has been used in other information computational contexts Therefore the many theses within this book are concerned with e Government design approaches implementation policies and requirements and monitoring dimensions need to be informed by the contextual characteristics in which they are implemented This book contributes to the body of knowledge by presenting an in depth analysis of a case of e Government implementation Therefore this book has its facts backed by intermittent reference to an empirical study done in Zambia to accentuate issues in design adoption usage and monitoring of e Government projects The case articulates the methodological issues in the design and measurement of e Government The use of a combination of structural equation modelling SEM exploratory factor analysis EFA and advanced techniques such as principal component analysis PCA in investigating different aspects of e Government in a developing country context has not been done in any previous research The novel methodological nuances articulated in this book can go a long way toward understanding the factors explaining successful implementation of e Government Previous publications have used basic statistical approaches devoid of adequate scientific or statistical rigour such as descriptive statistics to arrive at factors influencing the success or failure of e Government Furthermore this book contributes to the body of knowledge by emphasising the different dimensions and issues of the multidimensional perspectives of e Government The book explores tangible pointers for design and implementation of e Government giving it the thrust to potentially guide actual implementation of e Government in African setups *Modular Forms and Fermat's Last Theorem* Gary Cornell,Joseph H. Silverman,Glenn Stevens,2013-12-01 This volume contains

expanded versions of lectures given at an instructional conference on number theory and arithmetic geometry held August 9 through 18 1995 at Boston University Contributor s include The purpose of the conference and of this book is to introduce and explain the many ideas and techniques used by Wiles in his proof that every semi stable elliptic curve over $\mathbb{Q}$ is modular and to explain how Wiles result can be combined with Ribet s theorem and ideas of Frey and Serre to show at long last that Fermat s Last Theorem is true The book begins with an overview of the complete proof followed by several introductory chapters surveying the basic theory of elliptic curves modular functions modular curves Galois cohomology and finite group schemes Representation theory which lies at the core of Wiles proof is dealt with in a chapter on automorphic representations and the Langlands Tunnell theorem and this is followed by in depth discussions of Serre s conjectures Galois deformations universal deformation rings Hecke algebras complete intersections and more as the reader is led step by step through Wiles proof In recognition of the historical significance of Fermat s Last Theorem the volume concludes by looking both forward and backward in time reflecting on the history of the problem while placing Wiles theorem into a more general Diophantine context suggesting future applications Students and professional mathematicians alike will find this volume to be an indispensable resource for mastering the epoch making proof of Fermat s Last Theorem **Robust and Online**

Large-Scale Optimization Ravindra K. Ahuja, Rolf H. Möhring, Christos D. Zaroliagis, 2009-10-26 Scheduled transportation networks give rise to very complex and large scale network optimization problems requiring innovative solution techniques and ideas from mathematical optimization and theoretical computer science Examples of scheduled transportation include bus ferry airline and railway networks with the latter being a prime application domain that provides a fair amount of the most complex and largest instances of such optimization problems Scheduled transport optimization deals with planning and scheduling problems over several time horizons and substantial progress has been made for strategic planning and scheduling problems in all transportation domains This state of the art survey presents the outcome of an open call for contributions asking for either research papers or state of the art survey articles We received 24 submissions that underwent two rounds of the standard peer review process out of which 18 were finally accepted for publication The volume is organized in four parts Robustness and Recoverability Robust Timetabling and Route Planning Robust Planning Under Scarce Resources and Online Planning Delay and Disruption Management Flexible AC Transmission Systems: Modelling and Control Xiao-Ping Zhang, Christian Rehtanz, Bikash Pal, 2006-03-28 This monograph presents advanced modelling analysis and control techniques of FACTS These topics reflect the recent research and development of FACTS controllers and anticipate the future applications of FACTS in power systems The book covers comprehensively a range of power system control problems from steady state voltage and power flow control to voltage and reactive power control to voltage stability control to small signal stability control using FACTS controllers The book presents the modelling of the latest FACTS controllers for power flow control compensation and power quality IPFC GUPF VSC HVDC and M VSCHVDC etc in power

system analysis The selection is evaluated by the actual and likely future practical relevance of each The material is derived mainly from the research and industrial development in which the authors have been heavily involved The book is timely and of great value to power engineering engineers and students of modelling simulations and control design of FACTS for a broad practical range of power system operation planning and control problems Dilemmas of Transition in Post-Soviet

Countries Joel C. Moses, 2003 Exploring the tensions inherent in transition this perceptive book offers a wide ranging overview of the impact of democracy and capitalism on the former Soviet republics Leading scholars assess the region's daunting problems in the key realms of privatization democratization foreign investment agrarian reform local governance and market economics The contributors argue that the central dilemma facing all these fledgling countries is the inherent contradiction between the immediate pursuit of privatization and foreign investment and the long term policy goal of democratization Offering both theoretical and comparative perspectives on the far reaching implications of nation building and democratic transition this valuable study will enable both students and scholars to comprehend the unique difficulties of transition **Modern Group Analysis: Advanced Analytical and Computational Methods in Mathematical Physics**
