Amazon Guide To The 50 Economic Indicators:

The No-Nonsense Guide to International Development Maggie Black, 2007-10-01 Overseas aid and international development are catch all terms that cover a multitude of activities and abuses This guide explains what development actually is and explores its political and economic roots It shows what can happen in the name of development and argues for a more organic social approach with those it seeks to serve as equal partners in the process Maggie Black has written books for the Oxford University Press UNICEF and Oxfam She has worked as a consultant for UNICEF Anti Slavery International and WaterAid among others and has written for the Guardian The Economist and BBC World Service States of Entanglement Sven Anderson, Alan Butler, David Capener, Donal Lally, Clare Lyster, Fiona McDermott, 2021-07-21 Investigates how data production and consumption territorialize the physical landscape filtered through Ireland s role in global communications and as told by the Irish Pavilion at the 2021 Venice Architecture Biennale features an installation that focuses on the materiality of data infrastructure in space As our everyday lives become increasingly entangled with data technologies the book addresses the utopian fantasy that surrounds the Cloud as transcending physical presence or resourcing By bringing the physical infrastructure around data and its impact on the environment under the spotlight it hopes to reframe how we understand data production and highlight the myth that information technologies are hidden and without major material manifestations on the landscape The context for the book is Ireland which has a significant historical role in the evolution of global communications and data infrastructure In 1866 the world s first transatlantic telegraph cable landed on the West coast of Ireland In 1901 the inventor of the radio Guglielmo Marconi transmitted some of the world s first wireless radio messages from Ireland across the Atlantic Ocean to Newfoundland Today Dublin has overtaken London as the data centre hub of Europe hosting 25% of all available European server space And by the year 2027 data centres are forecast to consume a third of Ireland s total electricity demand The book aims to raise awareness around the hardware of the global internet and Cloud services which is interwoven with the Irish landscape made manifest through the vast constellation of data centres fibre optic cable networks and energy grids that have come to populate its cities and suburbs over recent decades The publication accompanies and supports Entanglement the Irish Pavilion at the 17th Venice Architecture Biennale by archiving the production of the pavilion filtered through a series of poetic excerpts that describe the form components content and furniture that make up the installation At the same time the book is conceived as more than just a catalog by positioning some of the cultural and spatial implications of data technologies in Ireland within a more universal context through contributions by ANNEX the team selected to produce the pavilion as well as invited contributors from the disciplines of Media Theory Journalism Computer Science Geography History and Architecture Digital Pricing Frank Frohmann, 2023-03-03 This is one of the first books to combine the current megatrend of digitalization and pricing as the most effective lever for increasing and sustaining profits The book presents the basics of digital pricing as well as modeling

methods and implementation examples This structure helps in tackling the latest developments and challenges due to digitalization Readers will gain a detailed insight into using innovative revenue and price models to generate a sustainable competitive advantage for their companies The author uses his cross industry experience to draw on several examples of innovative digital pricing approaches which can be applied in industrial sectors such as automotive industrial goods and machinery as well as service sectors like telecommunications transportation and tourism Digital Economy Report 2024 United Nations Conference on Trade and Development (UNCTAD),2024-07-10 The Digital Economy Report 2024 turns the attention to the environmental footprint of digitalization The Report discusses environmental impacts along the life cycle of digital devices and information and communications technology infrastructure with regard to raw material extraction and processing manufacturing distribution use and the end of life phase The direct effects on natural resources including transition minerals energy and water as well as greenhouse gas emissions and waste related pollution can be said to constitute the environmental footprint of the ICT sector There are also indirect environmental effects from the use of digital technologies and services in different sectors of the economy and the Report includes a dedicated chapter on e commerce The report underlines the need to maximize the positive impact of digitalization while minimizing the negative impacts on environmental sustainability
