The Science of Government in Connection with American Institutions Joseph Alden, 1866 *Homesteading the Plains* Richard Edwards, Jacob K. Friefeld, Rebecca S. Wingo, 2017 Homesteading the Plains offers a bold new look at the history of homesteading overturning what for decades has been the orthodox scholarly view The authors begin by noting the striking disparity between the public's perception of homesteading as a cherished part of our national narrative and most scholars harshly negative and dismissive treatment Homesteading the Plains reexamines old data and draws from newly available digitized records to reassess the current interpretation's four principal tenets homesteading was a minor factor in farm formation with most Western farmers purchasing their land most homesteaders failed to prove up their claims the homesteading process was rife with corruption and fraud and homesteading caused Indian land dispossession Using data instead of anecdotes and focusing mainly on the

nineteenth century Homesteading the Plains demonstrates that the first three tenets are wrong and the fourth only partially true In short the public s perception of homesteading is perhaps more accurate than the one scholars have constructed Homesteading the Plains provides the basis for an understanding of homesteading that is startlingly different from current scholarly orthodoxy

The Connected Past Tom Brughmans, Anna Collar, Fiona Coward, 2016-03-04 One of the most exciting recent developments in archaeology and history has been the adoption of new perspectives which see human societies in the past as in the present as made up of networks of interlinked individuals This view of people as always connected through physical and conceptual networks along which resources information and disease flow requires archaeologists and historians to use new methods to understand how these networks form function and

change over time The Connected Past provides a constructive methodological and theoretical critique of the growth in research applying network perspectives in archaeology and history and considers the unique challenges presented by datasets in these disciplines including the fragmentary and material nature of such data and the functioning and change of social processes over long timespans An international and multidisciplinary range of scholars debate both the rationale and practicalities of applying network methodologies addressing the merits and drawbacks of specific techniques of analysis for a range of datasets and research questions and demonstrating their approaches with concrete case studies and detailed illustrations As well as revealing the valuable contributions archaeologists and historians can make to network science the volume represents a crucial step towards the development of best practice in the field especially in exploring the interactions between social and material elements of networks and long term network evolution **The American Historical Record**
