STUDIES IN AMERICAN CIVILIZATION Andreea Maria POPESCU, 2025-01-01 American civilization is one of the most challenging topics associated to cultural studies The beginnings reflect the attempts of the first colonists to tame and assimilate the new land Concepts like self reliance and self determination characterize the gradual conquest of the west or the gold rush American civilization consists of the efforts people made to transform the once hostile land into a home Gradually the Americans were involved in international matters as well The two world wars showed the decision of the people of America to bring order and harmony in other countries too The frontier which was the imaginary line that had to be crossed so that wilderness turned into a haven changed into the race for the conquest of the universe In America culture and civilization mingle with literature which renders the vision of the writers on their topics The present book attempts at unveiling the main features of a unique and fascinating world concentrating on the essential events shaping the nation

Facing the Abyss George Hutchinson, 2018-01-23 Mythologized as the era of the good war and the Greatest Generation the 1940s are frequently understood as a more heroic uncomplicated time in American history Yet just below the surface a sense of dread alienation and the haunting specter of radical evil permeated American art and literature Writers returned home from World War II and gave form to their disorienting experiences of violence and cruelty They probed the darkness that the war opened up and confronted bigotry existential guilt ecological concerns and fear about the nature and survival of the human race In Facing the Abyss George Hutchinson offers readings of individual works and the larger intellectual and cultural scene to reveal the 1940s as a period of profound and influential accomplishment Facing the Abyss examines the relation of aesthetics to politics the idea of universalism and the connections among authors across racial ethnic and gender divisions Modernist and avant garde styles were absorbed into popular culture as writers and artists turned away from social realism to emphasize the process of artistic creation Hutchinson explores a range of important writers from Saul Bellow and Mary McCarthy to Richard Wright and James Baldwin African American and Jewish novelists critiqued racism and anti

Semitism women writers pushed back on the misogyny unleashed during the war and authors such as Gore Vidal and Tennessee Williams reflected a new openness in the depiction of homosexuality The decade also witnessed an awakening of American environmental and ecological consciousness Hutchinson argues that despite the individualized experiences depicted in these works a common belief in art s ability to communicate the universal in particulars united the most important works of literature and art during the 1940s Hutchinson s capacious view of American literary and cultural history masterfully weaves together a wide range of creative and intellectual expression into a sweeping new narrative of this pivotal decade
