Ufo'S (The Reality) William Calderwood, 2015-04-10 The subject of UFOs I believe is one of the most important subjects there is because of its implications If an alien craft under intelligent control can shut down our nuclear missile systems which is a national security issue it has to be an important subject My interest began while in the service on a destroyer off the Korean coast when I heard that in the fall of 1951 a UFO was observed circling the task force and was picked up on 14 radars in the task force that began my interest in UFOs and have remained with me ever since After returning from the service I later had the opportunity to work for Boeing aero space on the Saturn V moon rocket worked at Michoud La 15 miles out of New Orleans Had a classified clearance while working there One night while lounging by the pool I was looking for the trail of a satellite going overhead when I noticed one of the stars by the big dipper started to move it traveled from the right side of the dipper to about the same distance on the left side and stopped After about two minutes it slowly faded

away knowing about space and that an object must travel at 17 000 miles an hour to remain in space or gravity would pull it down to earth it had to be a UFO After two and a half years at Michoud Boeing opened a new branch at Cape Kennedy Florida and I put in for a transfer there was accepted and worked in system interface control received a secret clearance while at the cape During the time I sat in on two lectures of UFOs the first was by Maj Keyhoe at the Marriott hotel in Coco Beach there was standing room only and he waved some documents and said UFOs were nuts bolts machines and were real objects The other lecture was at Patrick AFB next to where I lived at Satellite Beach The first half of his presentation was a slide show showing the most ridiculous UFOs imaginable an air force presentation The last half was his own personal experience when flying a cargo plane from a southern state to Washington D C A bright yellow UFO came His plane and followed him all the way to Washington D C after I left Boeing and came back home I turned on the TV to watch a new series called project blue book and it was directed by retired col Coleman Once hooked the subject stays with you for life

Aliens George Edgar Slusser,1987 How and when does there come to be an anthropology of the alien This set of essays written for the eighth J Lloyd Eaton Conference on Fantasy and Science Fiction is concerned with the significance of that question Anthropology is the science that must designate the alien if it is to redefine a place for itself in the universe according to the Introduction The idea of the alien is not new In the Renaissance Montaigne's purpose in describing an alien encounter was excorporation man kind was the savage because the artificial devices of nature controlled him Shakespeare's version of the alien encounter was incorporation his character of Caliban is brought to the artificial political world of man and incorporated into the body politic The essays in this volume show in their general orientation that the tribe of Shakespeare still in literary studies at least outnumbers that of Montaigne These essays show the interrelation of the excorporating possibilities to the internal soundings of the alien encounter within the human mind and form This book is divided into three parts
