General mathematics is a subject area through which a student exposes oneself to other spheres of the correlated content areas duly indicated in the prescribed curriculum. This collection is primarily meant for students of grade six of most of the balanced curriculum duly prescribed by different boards. It can be considered more suitable for aspirants having affinity to opt for some higher challenges. One can even consider this collection for Olympiads and various other foundation courses. This workbook contains some activity sheets and reference worksheets suitable for the students of Grade 9. It is also suitable for aspirants preparing for Olympiads and other such enrichment activities. Answer sheets with explanations are there in a separate booklet. It will enable parents and teachers for organizing the task in a better way. I am confident enough about the competence of fellow students having willingness to move up to the final stage of the Mathematics Enrichment Activities of various stages. There are different worksheets in accord to the time of studies that can be assigned to the fellow student. Answers are in a separate sheet paper that can be kept at different place. Parents and teachers use this book of activities to develop interest of students on mathematical as well as analytical skills. Most of the calculations duly involved in these activities are of common types. One can do it with a little bit easiness. The core of the curriculum represents the format of most of the school curriculum we have in practice at different boards. Most of the parts are from School level formats of general types. Main topics incorporated in this practice book are as follows: 1 Understanding numbers in their standard form and expanded form 2 Decimals and fractions 3 Ratio proportion and percentage 4 Algebraic Expressions and Identities 5 Identities Equations of various forms 6 Graphs Everyday mathematics 7 Divisibility rules factors multiples and prime numbers 8 Lines rays line segments angles and basic shapes 9 Data handling bar graphs pie charts 10 Measurements Length outer boundaries and areas 11 General Understanding of Basic Shapes and three dimensional objects 12 Conversion of decimals fractions and percentage 13 Problem solving abilities. Questions are there without respective answers. It can be obtained from the source. There exists a plan of fulfilling dual purpose of the effort. These sets can be utilized to engage a student for working out the possible outputs without being inflicted primarily with answers. If answers are provided alongside the questions then the material will fulfill half of the purpose. It cannot be contingent for overcoming the problems and also cannot facilitate in skill enhancement efforts. Set of questions can be used for the purpose of assessing skill acquisition process and also can be assigned to the ward by parents and guides. It is not mandatory to go through all sets of problems but not to skip any of the problems is recommended for assuring the perfect skill acquisition.
