Epidemiology of Avian Influenza Viruses Irene Iglesias, Timothée Vergne, Mathilde C. Paul, Paolo Mulatti, Thanawat Tiensin, 2019-08-29 Avian influenza is a highly contagious viral disease characterized by intense circulation in the wild waterbird reservoirs with periodical introductions into the domestic poultry sector AI viruses have

been the source of devastating economic losses in the poultry industry over the last three decades and have become a major veterinary and public health concern due to their zoonotic potential. The most emblematic illustration of this impact has been the emergence of the HPAI H5N1 virus in southern China in the mid 1990s followed by its continental spread across East and Southeast Asia and the unprecedented epidemics recorded in 2003-2004. More recently from 2014 to 2017 several subtypes of HPAI including H5N1, H5N6, H5N8 emerged in East Asia and spread intercontinentally stressing the crucial role of this geographical hotspot as a source of new HPAI subtypes. The international dimension and the difficulty to effectively control those epidemics highlight the need for a global approach to HPAI surveillance and a comprehensive knowledge on epidemiology and patterns of the disease. This Research Topic aims at contributing to fill this gap. It includes ten papers which supplement the knowledge of the epidemiology of AI and offer new approaches on control strategies in various regions of the world.

Global Animal Law from the Margins Iyan Offor, 2023-08-01

This book critically engages the emerging field of global animal law from the perspective of an intersectional ethical framework. Reconceptualising global animal law, this book argues that global animal law overrepresents views from the west as it does not sufficiently engage views from the Global South as well as from Indigenous and other marginalised communities. Tracing this imbalance to the early development of animal law's reaction to issues of international trade, the book elicits the anthropocentrism and colonialism that underpin this bias. In response, the book outlines a new intersectional second wave of animal ethics. Incorporating marginalised viewpoints, it elevates the field beyond the dominant concern with animal welfare and rights. And drawing on aspects of decolonial thought, earth jurisprudence, intersectionality theory and posthumanism, it offers a fundamental rethinking of the very basis of global animal law. The book's critical yet practical new approach to global animal law will appeal to animal law and
