As a companion volume to Marzano's *The Art and Science of Teaching*, the handbook is intended to be a guide for individual teachers, study groups, and professional developers working together to improve their teaching. It is organized into 25 modules, each related to one of the 10 design questions introduced in the earlier book. Each module begins with a series of reflection questions and concludes with a set of self-assessment questions that allow the reader to determine areas that might need further work. At the heart of each module are specific strategies for addressing the key components of effective teaching. Dozens of examples illustrate the strategies in action in elementary and secondary classrooms in all subject areas. The strategies provide a thorough grounding in the science of teaching. How a teacher chooses to implement them constitutes the art of teaching. Both elements are necessary for improving student achievement and creating successful schools. For anyone committed to developing a wide range of teaching skills, this handbook is a welcome road map to best practices.

Project Animal Farm Sonia Faruqi, 2015-07-15. Sonia Faruqi had an Ivy League degree and a job on Wall Street. But when the banking industry collapsed, she found herself on a small organic dairy farm that would change her life for the better, although it didn't seem that way in the beginning. First, she had to come to grips with cows, shocked into place, cannibal chickens, and free-range turkeys that went nowhere. But there were bright lights, as well, happy frolicking calves on a veal farm, and farmers who cared as much about the animals as their pocketbooks. What started as a two-week volunteer vacation turned into a journey that reached into the darkest recesses of the animal agriculture industry. Surrounded by a colorful cast of characters, Faruqi's quest to discover the truth about modern agribusiness took her around the world. Lively, edgy, and balanced, *Project Animal Farm* sheds light on the international agribusiness with the ultimate goal of improving the lives of farm animals here at home. Using her finance background to forecast the future of agriculture, Faruqi discusses the changes we need to make using our forks and our votes.
