**Practical Precision Livestock Farming** T. Bahanzi, V. Halas, F. Maroto-Molina, 2023-08-14 Precision livestock farming PLF technologies have been heavily promoted in the past but the implementation of these technologies is not easy Numerous technical challenges need to be solved before PLF technologies will supply the desired information in a reliable and consistent way Farm implementations regularly encounter difficulties The practical experience associated with these technologies do not always match their theoretical potential 93 authors from 16 countries were asked to report on the actual practical experiences technology developers and users had under farm conditions to try and understand this difference between practice and theory This book aims to eliminate the mystery behind the Smart PLF tools and presents the hard facts reported by individuals that have practical experience using these technologies The book also explores various aspects of PLF including the 1 challenges associated with developing and using various technologies 2 the importance of training and ethical aspects of PLF tools and 3 the difficulties related to commercialisation of PLF systems We hope that the honest presentation of the pros and cons of PLF management tools will help the supporters of precision farming to better use and interact with modern technologies and thus sustain viable livestock production worldwide

**Biosecurity in Animal Production and Veterinary Medicine** Jeroen Dewulf, Filip Van Immerseel, 2019-12-01 Globally the way the animal production industry copes with infectious diseases is changing The excessive use of antimicrobials is under debate and it is becoming standard practice to implement thorough biosecurity plans on farms to prevent the entry and spread of pathogenic micro organisms Not only in farm animal production but also in facilities where companion animals are kept including in veterinary practices and clinics

awareness of the beneficial implications of a good biosecurity plan has raised The book Biosecurity in Animal Production and Veterinary Medicine is the first compilation of both fundamental aspects of biosecurity practices and specific and practical information on the application of the biosecurity measures in different animal production and animal housing settings

Gaskill, 2020-10-14 The concept of the 3Rs Refinement Reduction and Replacement has been used as a framework for improving the welfare of laboratory animals for the last half century By establishing an animal centric view on housing and management Animal centric Care and Management Enhancing Refinement in Biomedical Research takes Russell and Burch's definition of Refinement as elimination of inhumanities and goes further Rather than fitting animals into experimental conditions it encourages readers to adjust conditions to better meet the behavioral emotional physical and physiological needs and preferences of the animals The team of expert authors from the fields of laboratory animal science ethology biology as well as animal training provide ideas for creating housing conditions and handling procedures that induce to the best of current abilities and knowledge a long term positive state of mind in the animals under our care This book is written for animal caretakers animal health technicians researchers animal facility managers laboratory animal veterinarians and anyone who engages in work with living experimental animals or is interested in the continuous improvement of laboratory animal welfare This interdisciplinary guide will act as a catalyst resulting in multiple viewpoints and fields collaborating to optimize laboratory animal welfare

*Agriculture, Autonomous Development, and Prospects for Industrialization in Africa* Emmanuel Ndhlovu, 2025-03-06 The book investigates the intersection of agriculture and development in Africa and how it impacts rural industrialisation prospects It provides a comprehensive view of the position of agriculture in African socio economic activities and the agricultural sector's potential as the source for continental development and industrialisation prospects Significant research has been done on African development with a focus placed on the problematic role played by slavery colonialism and later by incompetent African leaders who failed to steer development of the type that delivers a progressive sustained and sustainable transformation of lives and societies There is limited focus on the possibility of agriculture being the potential basis of African development and the chance for industrialisation This is a matter of concern considering the dominance of agriculture as a livelihood and income source for many people on the continent In contributing to the debate on development in Africa this book aims to show how agriculture can serve as the basis for African development and industrialisation This will

be achieved by i providing a detailed historical description of the position of agriculture in African socio economic activities ii outlining the trajectory of African development with a focus on agriculture innovation and mechanisation iii identifying challenges to the development of African agriculture iv exploring the opportunities for agricultural development in Africa and v providing practical and policy recommendations to improve African agriculture and make it the engine for development and industrialisation Utilising a multidisciplinary approach which combines political economy social policy financial inclusion and empowerment approaches the book also shows how engagement of youth and women digitalisation and the provision of support by public and private actors can jump start agriculture as the engine of African development and industrialisation Taken together with this conscious effort to promote a multi disciplinary discussion the book is valuable reading for students policymakers and activists interested in emerging new directions in African development thinking and research

*Innovations in cryoconservation of animal genetic resources* Food and Agriculture Organization of the United Nations, Boes, J, Boettcher, P, Honkatukia, M, 2023-01-17 The livestock sector faces a range of challenges including climate change emerging diseases competition for natural resources and evolving demand for animal source foods which is increasing globally especially in developing countries Genetic diversity of livestock is a key resource for allowing livestock keepers to address these challenges but this diversity has been in a state of decline The diminishing genetic diversity thus represents yet another obstacle for sustainable livestock production Cryoconservation i e ex situ in vitro conservation of genetic resources through gene banking provides one of the most powerful tools governments and other stakeholders have to manage genetic diversity in both the short and long term and thereby provide future generations with the tools to meet the challenges ahead Gene banking genetic resources fits within the context of the Global Plan of Action for Animal Genetic Resources which was developed and adopted by FAO Member Nations Specifically Strategic Priority 9 of the Global Plan of Action is Establish or strengthen ex situ conservation programmes and Strategic Priority 11 urges countries to Develop approaches and technical standards for conservation To assist countries in the implementation the Global Plan of Action FAO worked with experts from around the world to prepare technical guidelines In 2012 FAO published FAO Guidelines on Cryoconservation of animal genetic resources Gene banking is a long term effort that needs to be viewed in terms of decades rather than years as demonstrated by similar systems for agricultural crops The responsibility for establishing such resources lies squarely within governments roles of providing public goods and food security Gene banking of animal genetic resources is a technology intense undertaking and the associated technologies are in a continual state of research and development The livestock sector also continues to evolve rapidly Since the development and release of the previous guidelines numerous changes have taken place Critical among these is a greater appreciation of the opportunities for actively utilizing cryopreserved material to enhance management of in vivo populations rather than as simply an insurance policy to protect breeds against extinction This key development has led to further changes in gene bank management First interaction with

users of the stored material has increased This in turn has created a need to involve stakeholders more closely in the management of genetic collections and to better monitor and document the processes of gene banking to ensure quality management

**Disaster Research and the Second Environmental Crisis** James Kendra, Scott G. Knowles, Tricia Wachtendorf, 2019-04-04 The 50th anniversary of the Disaster Research Center of the University of Delaware provoked a discussion of the field's background, its accomplishments, and its future directions. Participants representing many disciplines brought new methods to bear on perennial problems relevant to effective disaster management and policy formation. However, new concerns were raised stemming from the fact that we live today in a globally unfolding environmental crisis every bit as pressing and worrisome as that of the 1960s when the Disaster Research Center was founded. This volume brings together ideas of participants from that workshop as well as other contributors. Topics include the history and evolution of disaster research, innovations in disaster management, disaster policy, and ethical considerations of disaster research. Readers interested in science and technology, public policy, community action, and the evolution of the social sciences will find much of interest in this collection.

*A Practical Guide to Toxicology and Human Health Risk Assessment* Laura Robinson, 2018-11-20 Toxicology, the study of the adverse effects of chemicals on living organisms, is the cornerstone to all aspects of chemical safety, and knowledge of the subject is needed in a wide spectrum of fields from the chemical industry to medicine, emergency services, forensics, and regulatory science. Toxicology involves the study of symptoms, mechanisms, treatments, and detection of poisoning, especially the poisoning of people. The many problems arising from a poor understanding of toxicology and its applications in hazard communication and chemical safety motivated the author's training courses and webinars, leading to this valuable book. Providing a practical and accessible guide, *A Practical Guide to Toxicology and Human Health Risk Assessment* enables readers to quickly build up knowledge and understanding of toxicology and its use in hazard identification, which is a fundamental part of chemical risk assessment. The book also covers current toxicological testing strategies and the use of physicochemical test data in hazard identification and exposure assessment. Examples are provided throughout the book to highlight important issues, along with a summary of the key points that have been covered in each of the respective chapters. The book concludes with a listing of online resources on toxicology and risk assessment.
