Prasad Jones Christydas, Nurhayati Nurhayati, S. Kannadhasan, 2025-03-21 The proceedings of the International Conference on Hybrid and Advanced Technologies ICHAT 2024 present a rich repository of cutting edge research on the various applications of machine learning deep learning and AI in cybersecurity healthcare agriculture and communication systems It highlights the revolutionary potential of data science in transforming traditional practices improving efficiency and accuracy

across diverse domains and addressing complex real world challenges These proceedings contain innovative neural network models for agriculture that can predict tractor fuel consumption and optimize smart irrigation besides suggesting greenhouse automation for enhanced agricultural productivity It also provides a roadmap for IoT based monitoring systems for asthma patients and machine learning approaches for early detection of diabetes cancer and aquatic plant ailments Through an array of practical examples and comparative studies the book further highlights advancements in machine learning for enhancing palm vein authentication combating fake news keeping data safe and improving customer segmentation in e commerce The findings would be instrumental in combating critical global issues and foster a deeper understanding of the role of AI in image processing cybersecurity medical diagnostics and intelligent systems in the future This will be a highly interesting guide to researchers data scientists and practicing professionals in the fields of artificial intelligence machine learning and cybersecurity It will also be of interest to healthcare professionals agricultural scientists and technology enthusiasts in fostering global collaborations exploring future challenges and opportunities and introducing state of the art technologies to streamline processes Handbook of Research on Advanced Hybrid Intelligent Techniques and Applications Bhattacharyya, Siddhartha, Banerjee, Pinaki, Majumdar, Dipankar, Dutta, Paramartha, 2015-11-03

Conventional computational methods and even the latest soft computing paradigms often fall short in their ability to offer solutions to many real world problems due to uncertainty imprecision and circumstantial data Hybrid intelligent computing is a paradigm that addresses these issues to a considerable extent The Handbook of Research on Advanced Hybrid Intelligent Techniques and Applications highlights the latest research on various issues relating to the hybridization of artificial intelligence practical applications and best methods for implementation Focusing on key interdisciplinary computational intelligence research dealing with soft computing techniques pattern mining data analysis and computer vision this book is relevant to the research needs of academics IT specialists and graduate level students *Proceedings of the International Conference on Computer Science, Electronics and Industrial Engineering (CSEI 2023)* Marcelo V. Garcia, Carlos Gordón-Gallegos, Asier Salazar-Ramírez, Carlos Nuñez, 2024-12-22 This volume serves as both a record of current knowledge and a testament to the ongoing commitment to excellence in research within these fields It stands as an invaluable resource for researchers practitioners and students who are seeking to expand their understanding and engage with the forefront of technological innovation This book is an essential resource for researchers practitioners and students offering insights and guidance for future innovations in computing technologies Handbook of Research on Manufacturing Process Modeling and Optimization Strategies Das, Raja, Pradhan, Mohan, 2017-03-10 Recent improvements in business process strategies have allowed more opportunities to attain greater developmental performances This has led to higher success in day to day production and overall competitive advantage The Handbook of Research on Manufacturing Process Modeling and Optimization Strategies is a pivotal reference source for the latest research on the various manufacturing methodologies and

highlights the best optimization approaches to achieve boosted process performance Featuring extensive coverage on relevant areas such as genetic algorithms fuzzy set theory and soft computing techniques this publication is an ideal resource for researchers practitioners academicians designers manufacturing engineers and institutions involved in design and manufacturing projects

Intelligent Systems and Networks Thi Dieu Linh Nguyen,Elena Verdú,Anh Ngoc Le,Maria Ganzha,2023-08-19 This book presents Proceedings of the International Conference on Intelligent Systems and Networks ICISN 2023 held at Hanoi in Vietnam It includes peer reviewed high impact research manuscripts that highlight the work based on Intelligent System and Networks The book presents ongoing research outcomes results and cutting edge works which are of importance to professionals and academics researchers It covers topics such as Computational Intelligence in Language and Speech Processing Software development methods Wireless Communications and Signal Processing IoT and Sensor Embedded Systems etc

Heterosis R. Frankel,2013-06-29 When trying to solicit authors for this book it became apparent that the causal factors for heterosis at the physiological and biochemical level are today almost as obscure as they were 30 years ago Though biometrical genetical analyses point to dispersion of complementary genes not overdominance as the major cause of the phenomenon plant breeders experience still suggests a cautious pragmatic approach to the dominance overdominance controversy in breeding hybrid cultivars Thus we are faced with a striking discordance between our limited comprehension of

the causal factors and mechanism of heterosis on the one hand and the extensive agricultural practice of utilization of hybrid vigor on the other. Such utilization is the result of the economic value of hybrid combinations displaying superior yields and qualities as well as stability of performance of benefits derived in breeding programs and of the enhanced varietal protection of proprietary rights. No comprehensive and critical analysis of the phenomenon of heterosis in economic plants has been published for the last three decades since the now classical book *Heterosis* edited by J W Gowen, Iowa State College Press Ames Iowa 1952. The present book attempts to fill the gap and to assess the status of our present knowledge of the concept, the basis, the extent and the application of heterosis in economic plants. *Basics Of Horticulture* K. V.

Peter, 2009-02-05 The book carries information on fundamentals of vegetables, fruits, ornamental plants, spices, medicinal and aromatic plants and post harvest technology. There are 15 chapters elaborating horticultural crops, apomixis, polyembryony, ideal soils, climate, water requirements, pests, diseases and nematode management, biological control of biotic stresses, biotechnology of spices and mechanization of orchards. Introductory chapter deals in nutshell all about the book. The most recent information is provided along with a detailed list of references for further reading. A separate chapter on Glossary of Horticultural Terms adds much value to the book as a ready reckoner to understand key words generally referred to in the science of horticulture. Eight appendices are attached narrating released varieties, hybrids in horticultural crops, research infrastructure in horticulture in India and abroad together with important web sites in all aspects of horticulture.

Agricultural Informatics Amitava Choudhury, Arindam Biswas, Manish Prateek, Amlan Chakrabarti, 2021-04-06 Despite the increasing population, the Food and Agriculture Organization of the United Nations estimates 70% more food will be needed in 2050 than was produced in 2006. Issues related to food production have yet to be completely addressed. In recent years, Internet of Things technology has begun to be used to address different industrial and technical challenges to meet this growing need. These Agro IoT tools boost productivity and minimize the pitfalls of traditional farming, which is the backbone of the world's economy. Aided by the IoT, continuous monitoring of fields provides useful and critical information to farmers, ushering in a new era in farming. The IoT can be used as a tool to combat climate change through greenhouse automation, monitor and manage water, soil and crops, increase productivity, control insecticides, pesticides, detect plant diseases, increase the rate of crop sales, cattle monitoring, etc. *Agricultural Informatics Automation Using the IoT and Machine Learning* focuses on all these topics including a few case studies and they give a clear indication as to why these techniques should now be widely adopted by the agriculture and farming industries.
