Gallagher, 2013-01-21 For far too long the discipline of International Relations has failed to engage with the study of genocide This is despite the fact that genocide holds a direct relationship with the central concepts of international relations the state war power and security This bold innovative and unique book sets out to tackle this by bringing the concept of

genocide into the discipline of IR via the English School in order to theorise the relationship between genocide justice and order Drawing on a wide range of primary and secondary interdisciplinary material from International Relations Genocide Studies Security Studies International Law History Politics and Political Theory this book aims to understand genocide within the context of International Relations and the implications that this has on policymaking Gallagher identifies the obstacles and challenges involved in bringing the study of genocide into IR and uniquely analyses the impact of genocide on the ordering structure of international society

Never Meant to Survive João H. Costa Vargas, 2023-06-14 *Never Meant to Survive* presents a historical political and social assessment of anti black genocide and liberatory struggles that arose to resist it Based on fine grained accounts of community life at the street level Costa Vargas s work presents crucial examples of political resistance and community activism By examining two cities linked by common experiences of Blackness Los Angeles and Rio de Janeiro this book identifies a prevailing genocidal force that organizes individuals and groups across society The 1965 and 1992 riots in Los Angeles the work of the Black Panther Party and favela activists in Brazil and police brutality in struggles between black communities and the state in both L A and Rio de Janeiro all figure importantly in Costa Vargas s compelling account What emerges from this analysis is a call for the destruction of the conditions that foster the marginalization of black communities and a halt to the internal conflicts between black social groups themselves

HIV/AIDS and the Social Consequences of Untamed Biomedicine Graham Fordham, 2014-11-13 Drawing on the case of HIV AIDS in Thailand this book examines how anthropological and other interpretative social science research has been utilized in modeling the AIDS epidemic and in the design and implementation of interventions It argues that much social science research has been complicit with the forces that generated the epidemic and with the social control agendas of the state and that as such it has increased the weight of structural violence bearing upon the afflicted The book also questions claims of Thai AIDS control success arguing that these can only be made at the cost of excluding categories such as intravenous drug users the incarcerated and homosexuals who continue to experience extraordinarily high levels of levels of HIV infection Considered deviant and undeserving these persons have deliberately been excluded from harm reduction programs Overall this work argues for the untapped potential of anthropological research in the health field a confident anthropology rooted in ethnography and a critical reflexivity Crucially it argues that in context of interdisciplinary collaborations anthropological research must refuse relegation to the status of an adjunct discipline and must be free epistemologically and methodologically from the universalizing assumptions and practices of biomedicine

Anthropology and the Politics of Representation Gabriela Vargas-Cetina, 2013-02 This book examines the inherently problematic nature of representation and description of living people specifically in ethnography and more generally in anthropological work as a whole In this book the editor brings together a group of international scholars who through their fieldwork experiences reflect on the epistemological political and personal implications of their own work To do so they focus on such topics as

ethnography anthropologists engagement in identity politics representational practices the contexts of anthropological research and work and the effects of personal choices regarding self involvement in local causes that may extend beyond purely ethnographic goals Massacres and Morality Alex J. Bellamy, 2012-09-27 Most cultural and legal codes agree that the intentional killing of civilians whether in peacetime or war is prohibited Yet despite this fact the deliberate killing of large numbers of civilians remains a persistent feature of global political life
