

Period 4 – 1800-1848

Topics and Learning	Key Concepts
Topic 4.1: Contextualizing Period Four Learning Objective A: Explain the context in which the republic developed from 1800 to 1848.	- The United States began to develop a modern democracy and celebrated a new national culture, while Americans sought to define the nation's democratic ideals and change their society and institutions to match them. - The nation's transition to a more participatory democracy was achieved by expanding suffrage from a system based on property ownership to one based on voting by all adult white men, and it was accompanied by the growth of political parties. - While Americans embraced a new national culture, various groups developed distinctive cultures of their own. - Increasing numbers of Americans, many inspired by new religious and intellectual movements, worked primarily outside of government institutions to advance their ideals. - Innovations in technology, agriculture, and commerce powerfully accelerated the American economy, precipitating profound changes to U.S. society and to national and regional identities. - New transportation systems and technologies dramatically expanded manufacturing and agricultural production. - The changes caused by the market revolution had significant effects on U.S. society, workers' lives, and gender and family relations. - Economic development shaped settlement and trade patterns, helping to unify the nation while also encouraging the growth of different regions. - The U.S. interest in increasing foreign trade and expanding its national borders shaped the nation's foreign policy and spurred government and private initiatives. - Struggling to create an independent global presence, the United States sought to claim territory throughout the North American continent and promote foreign trade. - The United States' acquisition of lands in the West gave rise to contests over the extension of slavery into new territories.
Topic 4.2: The Rise of Political Parties and the Era of Jefferson Learning Objective B: Explain the causes and effects of policy debates in the early republic.	 <i>Marbury v. Madison</i> and Judicial Review - In the early 1800s, national political parties continued to debate issues such as the tariff, powers of the federal government, and relations with European powers. - Supreme Court decisions established the primacy of the judiciary in determining the meaning of the Constitution and asserted that federal laws took precedence over state laws.  Following the Louisiana Purchase, the U.S. government sought influence and control over North America through a variety of means, including exploration and diplomatic efforts.
Topic 4.3: Politics and Regional Interests Learning Objective C: Explain how different regional interests affected debates about the role of the federal government in the early republic.	 Plans to further unify the U.S. economy, such as the American System, generated debates over whether such policies would benefit agriculture or industry, potentially favoring different sections of the country. Regional interests often trumped national concerns as the basis for many political leaders' positions on slavery and economic policy. Congressional attempts at political compromise, such as the Missouri Compromise, only temporarily stemmed growing tensions between opponents and defenders of slavery.
