*An Inquiry into the Nature and Causes of the Wealth of States* Arthur Laffer, Stephen Moore, Rex A. Sinquefeld, Travis H. Brown, 2014-04-14 A passionate detailed quantified argument for state level tax reform *An Inquiry into the Nature and Causes of the Wealth of States* explains why eliminating or lowering tax burdens at the state level leads to economic growth and wealth creation A passionate argument for tax reform the book shows that even states with small populations can benefit enormously with the right policies The authors detailed exposition evaluates the impact state and local government policies have on a state s relative performance and economic growth overall backed up with economic data and analysis Facts don t lie But they do point clearly to the failure of so called progressive tax schemes designed more to curry favor with selected constituencies than to create an economic system that leads to individual wealth as the reward for hard work and entrepreneurial risk taking *An Inquiry into the Nature and Causes of the Wealth of States* is a detailed and critical look at income taxation across the nation and drills down into an analysis of the economic growth or malaise that results from tax policy Arguing eloquently that a state cannot tax itself into prosperity just as the impoverished cannot spend themselves into wealth the authors point out what many inherently know but often fear to say out loud The book provides detailed quantitative analysis and discusses the policy variables that can have enormous effects on the financial well being of states and individual residents such as Personal and corporate income tax rates Total tax burden as a percentage of personal income Estate and inheritance taxes Right to work laws *An Inquiry into the Nature and Causes of the Wealth of States* shows everyone how to evaluate state level fiscal and economic policies to become more competitive **Women, Crime, and Justice** Elaine Gunnison, Frances P. Bernat, Lynne Goodstein, 2016-08-01 *Women Crime and Justice Balancing the Scales* presents a comprehensive analysis of the role of women in the criminal justice system providing important new insight to their position as offenders victims and practitioners Draws on global feminist perspectives on female offending and victimization from around the world Covers topics including criminal law case processing domestic violence gay lesbian and transgendered prisoners cyberbullying offender re entry and sex trafficking Explores issues professional women face in the criminal justice workplace such as police culture judicial decision making working in corrections facilities and more Includes international case examples throughout using numerous topical examples and personal narratives to stimulate students critical thinking and active engagement Digital Trade and Data Privacy Roman Pascal Kalin, 2024-11-26 This monograph provides a comprehensive examination of the intricate legal challenges arising at the intersection of digital trade and data privacy It argues in favour of an integrated approach to understanding the dynamic interaction between digital trade and data privacy with the aim of building a bridge between these two fields of law Cross border data flows are paramount for the operational efficiency and productivity of companies across diverse industries The ongoing economic transformation characterized by the perception of data as both a commodity and currency exacerbates the tension between the push for

economic liberalization of cross border transfers of personal data under a trade rationale and the limitations imposed on such transfers for non economic reasons Given that the regulation of cross border personal data transfers is profoundly influenced by both international trade law and national data privacy laws a complex relationship has developed between the normative values that underpin these legal frameworks This publication centers on the resulting interdependence of digital trade and data privacy in a global digital economy It provides a contribution to the debate on a re contextualisation of trade law against the background of the advent of digital trade

*The Single-tier State Pension* Great Britain: Parliament: House of Commons: Work and Pensions Committee,2013-04-04 This report welcomes the improvements in retirement income that the new Single tier State Pension will bring However the key to the policy s successful implementation lies in the Government informing the public as soon as possible about how it will affect individuals The Committee criticises the Government for hampering its scrutiny of the proposals The Government not only imposed an extremely tight timetable but brought forward the implementation date by a year after the Committee had completed taking evidence The Committee says that the Government must work with them to ensure the transition is as smooth as possible and that Defined Benefit pension schemes do not suffer as a result The Government should also develop and publish a clear explanation of how means tested support including passported benefits will operate under the Single tier Pension and the transitional protection that will be put in place Many women born between 1952 and 1953 believed that they would suffer a double adverse effect on their State Pension income arising from the increases in their State Pension Age combined with their ineligibility for the Single tier Pension if it was introduced in 2017 as set out in the White Paper The Government should clarify the position Some women did not build up their own NI record because they had an expectation that they would be able to rely on their husband s contributions to give them entitlement to a Basic State Pension The Government should assess and publish the cost of allowing women in this position who are within 15 years of State Pension Age to retain this right

The Practice of Prescribing Opioids Thomas F. Kallman,2025-10-08 Chronic pain affects around 20% of the general population and can therefore be considered a public health problem Apart from the issue of pain itself chronic pain often has far reaching consequences on an individual s physical and mental well being functioning and quality of life QoL Opioids are narcotic drugs with potent analgesic properties and these drugs have in modern medical practice become widely used in acute cancer related and chronic non cancer pain CNCP conditions However guidelines generally advise against the use of opioids for CNCP because of lack of efficacy regarding improvements in pain intensity physical functioning and QoL for patients with CNCP Furthermore serious adverse effects may be associated with

opioid treatment for both individuals and society as evidenced by the opioid epidemic in the United States. The overarching aim of this doctoral thesis was to contribute knowledge on how physicians in clinical practice can prescribe opioids in a safer manner. The problem of pain, opioids, the opioid-treated patient, and the prescriber are first introduced and detailed. Thereafter, each study is thoroughly described. Paper I and II used quantitative methodology, and Paper III used qualitative methodology. More specifically, Paper I was a cross-sectional registry-based study on patients referred to specialized pain care at the Pain and Rehabilitation Clinic in Linköping in 2015. Medication data were self-reported and matched with patient-reported outcome measures (PROMs) that were extracted from the Swedish Quality Registry for Pain Rehabilitation. 441 patients had complete medication data and PROMs; 30% used opioids daily, and 13% used opioids as needed. Daily opioid treatment did not correlate with better PROMs when compared to patients without opioid treatment. Despite some methodological limitations, this study added important prevalence data regarding opioid use in chronic pain patients in Sweden and added to the growing body of knowledge which challenges the notion that opioids lead to improved pain, physical function, or QoL for patients with CNCP. In Paper II, 25 men and 12 women with head and neck cancer who received adjuvant radiotherapy (RT) were followed for 12 months. When RT-induced mucositis began to subside, opioid tapering was started, and blood samples were drawn at five time points. In men, after opioid tapering began, testosterone and dehydroepiandrosterone sulfate levels increased quickly during the first month and remained relatively constant thereafter. Significant changes in levels of follicle-stimulating hormone (FSH) and prolactin were also seen. In postmenopausal women, levels of FSH and luteinizing hormone changed significantly during the study period. Two premenopausal women were presented as case reports which indicated that opioid-induced changes on estradiol were reversed after tapering began. This study indicated that previously known opioid-induced effects on endocrine measures, e.g., opioid-induced hypogonadism, were reversible after opioid tapering was started. In Paper III, 20 board-certified pain specialists were interviewed digitally, and interviews were transcribed verbatim. Manifest inductive content analysis was used to analyze interviews, and the experiences of pain specialists were summarized in two main categories: Navigating the doctor-patient relationship and Challenges and opportunities when prescribing opioids. The former included communication, conflicts, managing expectations, and the emotional and ethical aspects of opioid prescribing, which pain specialists had experienced. The latter included handling complexity and heterogeneity, organizational aspects, and the doctor's due diligence, which was needed when prescribing opioids. This study identified important prescriber needs and opportunities for system-level improvements, such as the issue of sufficient time when prescribing, which would likely support responsible and safer opioid prescribing in health care. Papers I-III are then synthesized in the thesis discussion, and leaning heavily on the results found in Paper III, the 4T model (time, team, trust, adjust) is suggested as a simple theoretical framework to support safe and responsible opioid practices in health care. The 4T model is presented as a pyramid of basic needs where each level builds upon each other. It is applicable not only to the individual prescriber but also to the health care systems in which prescribers

work The 4T model offers the prescriber a flexible approach to assess the potential benefits and risks a patient may experience and be exposed to due to their opioid treatment respectively The 4T model may also support health care systems in identifying which level of the pyramid may be lacking allowing issues related to opioid prescribing to be addressed thereby supporting safer opioid prescribing In conclusion Papers I III indicated that on group level opioid efficacy for treating CNCP was lacking that there were potential benefits to tapering opioids and that the risks and benefits associated with opioid prescribing required complex assessments to be made by prescribers which may strain the doctor patient relationship and that simple system level changes would likely lead to improved prescribing practices All in all this doctoral thesis provides quantitative and qualitative insights into the practice of prescribing opioids in clinical practice with emphasis on opioid prescribing in a chronic non cancer pain setting
