

The background of the entire image is a view from the cockpit of an Airbus A320, looking out through the windshield at a sunset or sunrise over a body of water. The sky is a gradient of blue and orange. In the foreground, the instrument panel is visible, with various gauges and displays. Overlaid on the instrument panel is a technical diagram of the A320's engine and fuel system, showing the flow of fuel from the tanks through the engines and the associated pumps and valves. The diagram is drawn in red and white lines on a dark background.

Logical Foundations for Rule-Based Systems Antoni Ligeza, 2006-01-25 Thinking in terms of facts and rules is perhaps one of the most common ways of approaching problem definition and problem solving both in everyday life and under more formal circumstances The best known set of rules the Ten Commandments have been accompanying us since the times of Moses the Decalogue proved to be simple but powerful concise and universal It is logically consistent and complete There are also many other attempts to impose rule based regulations in almost all areas of life including professional work education medical services taxes etc Some most typical examples may include various codes e g legal or traffic code regulations especially military ones and many systems of customary or informal rules The universal nature of rule based formulation of behavior or inference principles follows from the concept of rules being a simple and intuitive yet powerful concept of very high expressive power Moreover rules as such encode in fact functional aspects of behavior and can be used for modeling numerous phenomena
