Poetics of the Iconotext Professor Liliane Louvel, 2013-05-28 Poetics of the Iconotext makes available for the first time in English the theories of the respected French text image specialist Professor Liliane Louvel A consolidation of the most significant theoretical materials of Louvel's two acclaimed books *L'Œil du Texte* *Texte et image dans la littérature anglophone* and *Texte Image Images lire textes voir* this newly conceived work introduces English readers to the most current thinking in French text image theory and visual studies Focusing on the full spectrum of text image relations from medieval illuminated manuscripts to digital books Louvel begins by introducing key terms and situating her work in the context of significant debates in text image studies Part II introduces Louvel's typology of pictorial saturation through which she establishes a continuum along which to measure the effect of the most figurative to the most literal images upon writerly and readerly textual spaces Part III adopts a phenomenological approach towards the reading viewing experience as expressed in conceptual categories that include the trace focal range synesthesia and rhythm and speed The result is a provocative interplay of the categorical and the subjective that invites readers to think at once more precisely and more inventively about texts images and the intersections between the two **Arts and Sciences** Charles Knight, 1868

Columbia Pictures Bernard F. Dick, 2021-10-19 Drawing on previously untapped archival materials including letters interviews and more Bernard F. Dick traces the history of Columbia Pictures from its beginnings as the CBC Film Sales Company through the regimes of Harry Cohn and his successors and ending with a vivid portrait of today's corporate Hollywood The book offers unique perspectives on the careers of Rita Hayworth and Judy Holliday a discussion of Columbia's unique brands of screwball comedy and film noir and analyses of such classics as *The Awful Truth* *Born Yesterday* and *From Here to Eternity* Following the author's highly readable studio chronicle are fourteen original essays by leading film scholars that follow Columbia's emergence from Poverty Row status to world class and the stars films genres writers producers and directors responsible for its transformation A new essay on Quentin Tarantino's *Once Upon a Time in Hollywood* rounds out the collection and brings this seminal studio history into the 21st century Amply illustrated with film stills and photos of stars and studio heads Columbia Pictures is the first book to integrate history with criticism of a single studio and is ideal for film lovers and scholars alike **Civil Service Journal**, 1977 **Doing Digital Methods** Richard Rogers, 2024-01-05 Cutting edge guide to applying the latest advancements in digital methods to social research **Spenser's Heavenly Elizabeth** Donald Stump, 2019-11-07 This book reveals the queen behind Edmund Spenser's *The Faerie Queene* Placing Spenser's epic poem in the context of the tumultuous sixteenth century Donald Stump offers a groundbreaking reading of the poem as an allegory of Elizabeth I's life By narrating the loves and wars of an Arthurian realm that mirrors Elizabethan England Spenser explores the crises that shaped Elizabeth's reign her break with the pope to create a reformed English Church her standoff with Mary Queen of Scots offensives against Irish rebels and Spanish troops confrontations with assassins and foreign invaders and the

apocalyptic expectations of the English people in a time of national transformation Brilliantly reconciling moral and historicist readings this volume offers a major new interpretation of *The Faerie Queene* *Somewhere in Between* Devin E. Caruthers, 2011-06-20 In the sixth chapter of John there is a story told about a miracle that Jesus performed by feeding 5000 people with two fish and five loaves of bread Many have read or heard this story but many miss the significant origin of the bread and fish In the story the young boy had these portions with him and you can perhaps speculate that he was carrying his lunch planning to hear Jesus preach I imagine that when he left his house that morning he had no idea that his small lunch would be used in a great miracle Some of the disciples who were with Jesus noticed the boy and pointed him out to Jesus Who knew that a young boy who the people did not know would be used by God in such a great way How often do you see our young men standing around you with no father to help them use what they have You often overlook them and fail to help them reach their full potential I imagine this young boy didnt have a prominent family name wasnt dressed in fancy clothes and wasnt rich but instead was a peasant from a poor village Yet Jesus stepped somewhere in between and used what the boy had to the glory of His father in heaven Many young men walk through life and have no idea of the potential that they carry with them Many of them need someone that is willing to be somewhere in between and help them realize their potential Just like the young boy many young men dont come from notable families or rich homes but all carry an unexpected miracle around with them every day The miracles are not always instantly recognizable but with the help of someone who is somewhere in between miracles can happen It doesnt take much to ignite the potential within but someone has to be willing to show them what they carry To be somewhere in between means to be whatever you have to be for each young man It means that youre willing to take them as they are broken and all and treat them as your own son Jesus could have very well ignored the young boy who had nothing to offer but two fish and five loaves of bread He could have looked at His own situation the need to feed many and dismiss the boy who could only feed one Instead Jesus looked at the potential of the meal and the boys willingness to share instead of the obstacles that seem to stand in the way Young men want someone with whom they can share their life their dreams and their potential miracles It is up to you as a mentor to put yourself in a position of being somewhere in between so that you can see the potential instead of the obstacles To truly be effective you have to be more than a mentor You have to be more than someone that pops in and out at your convenience It is never convenient to be somewhere in between but it is necessary *Somewhere In Between* is not only an effective guide to mentoring it is mentoring Gods way *Choosing and Using a Refracting Telescope* Neil English, 2010-09-28 *Choosing and Using a Refracting Telescope* has been written for the many amateur astronomers who already own or are intending to purchase a refracting telescope perhaps to complement their existing arsenal of larger reflecting telescopes or for the specialist who requires a particular refractor for serious astronomical applications or nature studies Four hundred year ago during the winter of 1609 a relatively unknown Italian scientist Galileo Galilei designed a spyglass with two crude lenses and turned it skyward Since

then refractors have retained their dominance over all types of reflector in studies of the Moon planets and double stars because of the precision of their optics and lack of a central obstruction in the optical path which causes diffraction effects in all commercially made reflectors Most mature amateur astronomers got started with a 60mm refractor or something similar Thirty years ago there was little choice available to the hobbyist but in the last decade long focus crown flint achromats have moved aside for some exquisitely crafted apochromatic designs offered by leading commercial manufacturers There has been a huge increase in the popularity of these telescopes in the last few years led by a significant increase in the number of companies particularly William Optics Orion USA StellarVue SkyWatcher and AstroTech who are now heavily marketing refractors in the amateur astronomical magazines In Choosing and Using a Refracting Telescope well known observer and astronomy writer Neil English celebrates the remarkable history and evolution of the refracting telescope and looks in detail at the instruments their development and their use A major feature of this book is the way it compares not only different classes of refractor but also telescopes of each class that are sold by various commercial manufacturers The author is perhaps uniquely placed to do this having used and tested literally hundreds of different refracting telescopes over three decades Because it includes many diverse subjects such as imaging with consumer level digital cameras imaging with webcams and imaging with astronomical CCD cameras that are not covered together in equal depth in any other single volume Choosing and Using a Refracting Telescope could become the refractor bible for amateur astronomers at all levels especially those who are interested in imaging astronomical objects of every class
