Today, the Tenth Edition of this gold standard training program meets the highest needs for paramedic medical systems and extensive paramedical resources that meet the diverse needs of today's emergency and medical systems.

Based on the National EMS Education Standards and the 2010 CPEBEC Guidelines, the Tenth Edition offers complete coverage of every competency standard with clarity and precision in a unique format that provides a robust comprehension and encourages critical thinking with vignettes and clinical scenarios in paramedic, along with new skills and theories, to ensure a robust and successful EMS training solution.

Current, State-of-the-Art Medical Content

The Tenth Edition incorporates evidence-based medical concepts to ensure that students are taught consistent and accurate medicine that will help patients in the field today.

Concept Reinforcement

The Tenth Edition is built on the premise that students need a solid foundation in the basic and then appropriate interventions. For example, the Tenth Edition provides students with a comprehensive understanding of anatomy, physiology, and pathophysiology of the human body. These concepts then are built on to ensure students understand the underlying pathophysiology of the human body and offering examples when studying specific strategies are.

The Tenth Edition also applies the unique approach of concept reinforcement to Patient Assessment. This critical topic is presented in a single, comprehensive chapter ensuring that students understand patient assessment as a single integrated process—the way that providers actually practice in the field. Each medical and trauma chapter includes a patient assessment process by highlighting the critical steps of the illness or injury.

Clear Application to Real-World EMS

Through involving patient case studies, the Tenth Edition gives students a genuine context for the application of the knowledge presented in the chapters. This approach makes it clear how all of this new information is applied to help patients in the field.
