the ways in which contemporary French women's writing and film give voice to and critique conceptions of happiness. Analysing French and francophone women's writing including Nina Bouraoui, Hélène Cixous, Annie Ernaux, Camille Laurens, Leïla Slimani, Delphine de Vigan and film including Claire Denis, Céline Sciamma and Agnès Varda, I focus on five main areas: images of happiness in consumer and Internet culture; happiness and intimacy in the family and the home; queering happiness; migrated happiness; and happiness and ageing. Whilst the happiness turn is problematic, the desire for happiness, however fraught, matters. I show how representations of happiness in contemporary French women's writing and film offer alternative conceptions of happiness that enable us to rethink happiness in more critical, diverse and inclusive terms.

Happiness Robin Barrow, 2011. The first part of the book reviews empirical work relating to happiness, including attitudinal studies, claims made in an educational context and postwar philosophical treatment of the concept. There is a useful account of Aristotle's pioneering work and a stimulating summary of some of the main themes to be found in the literature concerning happiness. In the second part, the author elucidates the concept of happiness and considers the significance, reliability and plausibility of the various empirical claims in the light of a clear understanding of what happiness is. After discussing whether happiness ought to be valued in general terms, the study concludes by outlining the ways in which it can be related to education and schooling and by suggesting action which could be taken in schools in order to promote happiness.

Reference and Anaphoric Relations H.K. von Stechow, U. Egli, 2001-11-30. The notions of reference and anaphoric relations have been discussed since antiquity and they are still one of the most challenging subjects in linguistics, logic and philosophy of language. The quest for a satisfying account of anaphoric reference has initiated a wide range of new and interesting approaches in formal semantics and recent research confirms the old insight that reference and anaphoricity are closely interrelated issues. This volume brings together fifteen original research articles on the representation and interpretation of indefinite and definite noun phrases, anaphoric pronouns and closely related issues such as scope and quantifier movement. The analyses are worked out within discourse representation theory, file change semantics and dynamic logic, a family of recent frameworks developed for the formal analysis of discourse semantics. Particular attention is paid to E-type theories of pronouns and to the use of choice functions in the semantics of noun phrases. The papers collected in this volume shed light on the question of how linguistic expressions establish reference and anaphoric relations. The use of choice function approaches within dynamic semantics opens new research perspectives on these questions. Audience: This book will be of interest to scholars and students of linguistics, logicians, philosophers of language, computational linguists and computer scientists with an interest in the semantics of natural language.

Explicit and Implicit Emotion Processing: Neural Basis, Perceptual and Cognitive Mechanisms Giulia Mattavelli, Alessia Celeghin, Noemi Mazzoni, 2021-06-23

Democrats and Republicans--rhetoric and Reality Joseph Fried, 2008. Are Democrats more tolerant than Republicans? Are they more intelligent? Who spends more time at work and who spends more time watching TV? Why are Republicans happier? Who

benefits more from Social Security All of these questions and many more are answered in *Democrats and Republicans Rhetoric and Reality* It uses authoritative survey evidence and statistics to compare the conduct and achievements of the Democratic and Republican constituencies Many of the findings are surprising For example Democrats and Republicans have different tendencies with regard to trust self esteem apparent intelligence political knowledge mental health happiness work hours charity and even body mass index These general differences are quantifiable and statistically significant The author principally relied on data from the General Social Survey and the American National Election Studies rounded out by surveys conducted by the Pew Research Center for the People and the Press the Gallup Organization the Institute for Public Policy and Social Research Harris Interactive and other organizations Although the book is aimed at the popular market it has all of the supporting references and statistical significance of an academic work Interspersed among the findings are quotations from pundits politicians philosophers celebrities fruitcakes etc Although some of this rhetoric is strident the book's overall tone is objective a refreshing alternative to the bombastic polemics we often see in modern political works The last chapter comprises several constructive lessons that can be learned from the various Democratic Republican comparisons This is the most comprehensive and authoritative book written about the constituencies of our two major political parties It should be in the personal library of anyone who is interested in American politics
