Nani, Emmanuel Bamfo-Agyei**

16 Academic Programmes And Admission Requirements Mthatha Campus:

Handbook of Research on Administration, Policy, and Leadership in Higher Education Mukerji, Siran, Tripathi, Purnendu, 2016-09-27 The creation of a sustainable and accessible higher education systems is a pivotal goal in modern society Adopting strategic frameworks and innovative techniques allows institutions to achieve this objective The Handbook of Research on Administration Policy and Leadership in Higher Education is an authoritative reference source for the latest scholarly research on contemporary management issues in educational institutions and presents best practices to improve policies and retain effective governance Addressing the current state of higher education at an international level this book is ideally designed for academicians educational administrators researchers and professionals International Handbook of Universities, 2010 **Higher Education in South Africa** Eli Bitzer, 2009-10-01 Higher Education in South Africa should be of considerable interest to higher education researchers outside of South Africa as well as within for the general and comparative assessments it makes The South African higher education researchers included within its covers have clearly engaged with research and writing from many parts of the world which they have then applied to make sense of their own condition Malcolm Tight Lancaster University UK **Study SA**, 2006 **Financial, Economic, Educational, and Technological Determinants of Environmental Sustainability** Funda H. Sezgin, Gamze Sart, Lina Karabetyan, 2024-10-28 This book is about financial economic educational and technological determinants of environmental sustainability from a global perspective This book analyzes different financial economic educational and technological indicators on environment and sustainable development in sample of different country groups and discusses the findings based on the related theoretical and empirical literature The results of bibliometric analyses in the book uncover that environment sustainability has become one of the most studied issues in the literature during the past four decades Furthermore the results of the empirical studies also verify that financial economic educational and technological factors have been significant drivers of environmental sustainability and sustainable development Therefore the results and recommendations made in this book will be useful for both researchers and policy makers to arrange the policies towards making progress in environmental sustainability and overall sustainable development **Development Practice in Eastern and Southern Africa** Tshilidzi Madzivhandila, Sepo Hachigonta, Joseph Francis, Joseph Kamuzhanje, Oluwatoyin Dare Kolawole, Shirley DeWolf, 2022-03-29 This book is a rare collection of reflective and reflexive stories that reveal how seasoned academics agents of grassroots social change leaders and journalists transformed and shaped the development landscape in eastern and southern Africa Whereas practical experiences are crucial assets and resources for shaping the academic environment and development practice landscape most of the existing literature recommended as key learning materials in tertiary institutions is rarely in synch with the practical realities of development practice The shared individual lived experiences from academic endeavours and fieldwork provide hands on tools for students and emerging practitioners who might be involved in or are currently

facilitating development work The thrust of the book therefore is to demystify the day to day experiences of development practitioners while contributing to learning pathways or strategies for achieving viable solutions to the myriad of challenges which grassroots communities face The relevance of the book as a crucial resource for students pursuing development oriented degree programmes in colleges and universities is obvious Without any doubt the compilation will be handy in the implementation of diverse development oriented transformation agenda at academic programming and policy levels

Sustainable Education and Development—Green Buildings Clinton Aigbavboa, Wellington Thwala, Joseph N.

Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel Bamfo-Agyei, 2024-11-22 This book is Volume 2 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of green buildings Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub-Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018 This decline occurred even before the onset of the COVID 19 pandemic Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019 Although

developing countries achieved a record of 245 7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020 The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent s development and the role of researchers The conference focusses on applied research discussions and its dissemination Researchers from research institutions academicians postgraduate students politicians and industry representatives will be the primary audience for the conference proceedings

Africanising the Curriculum Professor Vuyisile Msila, Professor Mishack T Gumbo, 2016-03-01 The alienating nature of the dominant curriculum in African schools and universities is an issue which simmered just below the surface in the 2015 student protests that swept through the South African higher education sector The collection of essays found in this timely publication offers compelling arguments for the deliberate embrace of the African culture to advance African knowledge and enhance African lives It proposes fresh perspectives on what shape and form a decolonised curriculum should take on

Liberation and Development Leslie Anne Hadfield, 2016-05-01 Liberation and Development Black Consciousness Community Programs in South Africa is an account of the community development programs of the Black Consciousness movement in South Africa It covers the emergence of the movement s ideas and practices in the context of the late 1960s and early 1970s then analyzes how activists refined their practices mobilized resources and influenced people through their work The book examines this history primarily through the Black Community Programs organization and its three major projects the yearbook Black Review the Zanempilo Community Health Center and the Njwaxa leatherwork factory As opposed to better known studies of antipolitical macroeconomic initiatives this book shows that people from the so called global South led development in innovative ways that promised to increase social and political participation It particularly explores the power that youth women and churches had in leading change in a hostile political environment With this new perspective on a major liberation movement Hadfield not only causes us to rethink aspects of African history but also offers lessons from the past for African societies still dealing with developmental challenges similar to those faced during apartheid

Children in South African Families Nene Ernest Khalema, Monde Makiwane, Mzikazi Nduna, 2016-09-23 This book presents a comprehensive overview of African children s lives in times of transition transformation and change some twenty two years after political emancipation in South Africa With diverse family formations non marital childbearing and diverse parenting situations prevalent in South Africa the book covers both the conceptual and theoretical questions that explore the context of children s experiences It uses examples from a range of primary and secondary data sources to illustrate how resilience in children faced with adversity could be nurtured demonstrating the links between theory and practice and critically commenting on questions of epistemology by drawing on

research with children within different African social and cultural contexts While the volume affirms the complexities of explaining child adversity or privilege it stresses the diversity of South African children s experiences and the importance of adopting both children s rights and Afro centric perspectives to account for the commonality and diversity of childhood and children s empowerment in diverse family systems The contributions also provide recommendations on how to respond and intervene in children s issues from both practical and policy levels in a dedicated manner to ensure that children are protected from harm nurtured to succeed and assisted during and after traumatic experiences This volume represents a valuable resource for scholars and students in the fields of humanities social science development studies and public health as well as policy makers child practitioners and child rights advocates
