Onukwuba, 2018-06-07 Focusing on Lagos Business School LBS in Nigeria this book explores the impact of strong alumni leadership on university excellence in Africa Strong leadership is crucial to the success of educational institutions and great importance is placed on their effective governance and management However many institutions fail to realise the positive impact that a strong alumni body can have on university excellence Drawing on definitions and theories of leadership the author seeks to establish the significance of alumni in enhancing a university's growth and development Providing comprehensive analysis of LBS this book is a unique resource for leaders of educational institutions as well as those studying and teaching in African business schools **Institutional Research in South African Higher Education** Jan Botha, Nicole J Muller, 2016-11-01 The book provides a thorough overview of Institutional Research IR i.e. applied higher education research undertaken within universities in South Africa It is a collection of essays focusing on the character and institutional setting of IR how IR is embedded into the mechanisms of steering shaping and reforming higher education and what the major results were of IR in select thematic areas The book is a valuable resource for higher education researchers and social researchers in South Africa interested in higher education It also deserves to be read by practitioners and policymakers in the field of higher education in South Africa It serves as an interesting case study for higher education researchers all over the world **University on the Border** Lis Lange, Vasu Reddy, Siseko H. Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution the university Corrupted Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the

political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions

Structuring Mass Higher Education David Palfreyman, Ted Tapper, 2012-10-12 Undoubtedly the most important development in higher education in recent years has been the seemingly inexorable expansion of national systems In a comparatively short time period many countries have moved from an elite to a mass model Furthermore expansion has invariably changed the whole experience of higher education for all the interested parties from presidents rectors and vice chancellors to first term undergraduates Structuring Mass Higher Education examines the impact of this change upon the existing national structures of higher education It also defines and highlights what makes an elite university something which institutions must strive for in order to gain their position as global players With case studies and contributions from a wide range of international authors the book explores questions such as Do higher education institutions retain a national significance even though the vestiges of an international reputation have long faded Has expansion undermined the quality of higher education because governments sought to expand on the cheap Is the elite institutional response to mass higher education perceived as a threat to be responded to with purposeful action that sustains their elite status Does the emergence of the international league tables pose a challenge to those responsible for governing elite institutions These are critical issues with which both policy makers and institutional leaders will have to grapple over the next ten years making Structuring Mass Higher Education a timely relevant and much needed text It will appeal to policy makers and practitioners within higher education as well as student and scholars worldwide

Higher Education in Africa Damtew Teferra, Jane Knight, 2008 The first of its kind this book documents and analyzes the international dimension of higher education in Africa based on country case studies and a consideration of relevant historical and contemporary themes It identifies trends developments and challenges related to the international dimension of higher education at the institutional national and regional levels It explores the institutional opportunities and probes the risks while it responds to the growing need for information and analysis of internationalization of higher education in Africa On the basis of this book project an effort is

underway to establish the African Network for Internationalization of Education ANIE This network aims to develop research capacity and expertise to meet the professional and practical needs of individuals institutions and organizations interested in the international dimension of higher education in Africa Doctoral Education in South Africa Nico Cloete,Johann Mouton,2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030 Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously **International Handbook of Universities** ,2010
