*Environmental Economics* Tom Tietenberg, Lynne Lewis, 2024-08-26 *Environmental Economics The Essentials* offers a policy oriented approach to the increasingly influential field of environmental economics that is based on a solid foundation of economic theory and empirical research. Students will not only leave the course with a firm understanding of environmental economics but they will also be exposed to a number of case studies showing how underlying economic principles provided the foundation for specific environmental and resource policies. This key text highlights what insights can be derived from the actual experience. Key features include Extensive coverage of the major issues including climate change, air and water pollution, sustainable development and environmental justice. Introductions to the theory and method of environmental economics including externalities, experimental and behavioral economics, benefit cost analysis and methods for valuing the services provided by the environment. Boxed Examples and Debates throughout the text which highlight global cases and major talking points. This second edition provides updated data, new studies and more international examples. There is a considerable amount of new material with a deeper focus on climate change. The text is fully supported with end of chapter summaries, discussion questions and self test exercises in the book as well as a suite of supplementary digital resources including multiple choice questions, simulations, references, slides and an instructor's manual. It is adapted from the 12th edition of the best selling *Environmental and Natural Resource Economics* textbook by the same authors.

**Imposing Regulation on Advanced Algorithms** Fotios Fitsilis, 2019-09-03 This book discusses the necessity and perhaps urgency for the regulation of algorithms on which new technologies rely. Technologies that have the potential to reshape human societies. From commerce and farming to medical care and education, it is difficult to find any aspect of our lives that will not be affected by these emerging technologies. At the same time, artificial intelligence, deep learning, machine learning, cognitive computing, blockchain, virtual reality and augmented reality belong to the fields most likely to affect law and in particular administrative law. The book examines universally applicable patterns in administrative decisions and judicial rulings. First, similarities and divergence in behavior among the different cases are identified by analyzing parameters ranging from geographical location and administrative decisions to judicial reasoning and legal basis. As it turns out, in several of the cases presented, sources of general law such as competition or labor law are invoked as a legal basis due to the lack of current specialized legislation. This book also investigates the role and significance of national and indeed supranational regulatory bodies for advanced algorithms and considers ENISA, an EU agency that focuses on network and information security, as an interesting candidate for a European regulator of advanced algorithms. Lastly, it discusses the involvement of representative institutions in algorithmic regulation.

*Comparative Consumer Sales Law* Geraint Howells, Christian Twigg-Flesner, Hans-W. Micklitz, Chen Lei, 2017-12-06 For many years, legislators around the world have responded to the particular needs of consumers by introducing dedicated rules for consumer sales contracts. In the European

Union a significant push came through the adoption of the Consumer Sales Directive 99/44/EC. Elsewhere in the world legislation focusing on consumer sales contracts has been introduced for example in New Zealand and Australia. This book offers a snapshot of the current state of consumer sales law in a range of jurisdictions around the globe. It provides both an overview of the law in selected jurisdictions and compares the application of these rules in the context of two case scenarios.

This text is adapted from the best selling Environmental and Natural Resource Economics 11th edition by the same authors. Environmental and Natural Resource Economics Tom Tietenberg, Lynne Lewis, 2018-03-13. Environmental and Natural Resource Economics is the best selling text for natural resource economics and environmental economics courses offering a policy oriented approach and introducing economic theory and empirical work from the field. Students will leave the course with a global perspective of both environmental and natural resource economics and how they interact. Complemented by a number of case studies showing how underlying economic principles provided the foundation for specific environmental and resource policies, this key text highlights what can be learned from the actual experience. This new 11th edition includes updated data, a number of new studies and brings a more international focus to the subject. Key features include Extensive coverage of the major issues including climate change, air and water pollution, sustainable development and environmental justice. Dedicated chapters on a full range of resources including water, land, forests, fisheries and recyclables. Introductions to the theory and method of environmental economics including externalities, benefit cost analysis, valuation methods and ecosystem goods and services. Boxed Examples and Debates throughout the text which highlight global examples and major talking points. The text is fully supported with end of chapter summaries, discussion questions and self test exercises in the book and multiple choice questions, simulations, references, slides and an instructor's manual on the Companion Website.
