Logical form has always been a prime concern for philosophers belonging to the analytic tradition For at least one century the study of logical form has been widely adopted as a method of investigation relying on its capacity to reveal the structure of thoughts or the constitution of facts This book focuses on the very idea of logical form which is directly relevant to any principled reflection on that method Its central thesis is that there is no such thing as a correct answer to the question of what is logical form two significantly different notions of logical form are needed to fulfill two major theoretical roles that pertain respectively to logic and to semantics This thesis has a negative and a positive side The negative side is that a deeply rooted presumption about logical form turns out to be overly optimistic there is no unique notion of logical form that can play both roles The positive side is that the distinction between two notions of logical form once properly spelled out sheds light on some fundamental issues concerning the relation between logic and language *The Future of Accessibility in International Higher Education* Alphin Jr., Henry C., Chan, Roy Y., Lavine, Jennie, 2017-05-17 Education is the foundation to almost all successful lives and it is important that a high level of schooling be available on a global scale Studying the trends in accessibility in education will allow educators to improve their own teaching techniques as well as expand their influence to more remote areas in the world The Future of Accessibility in International Higher Education is a comprehensive reference source for the latest scholarly material on emerging methods and trends in disseminating knowledge in university settings Featuring extensive coverage on relevant topics such as e learning economic perspectives and educational technology this publication is ideally designed for educators academics students and researchers interested in expanding their knowledge of global education
