Learning Rates of Electric Vehicles Andreas Zerfaß, 2017-11-01 Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport related carbon dioxide CO₂ and air pollutant emissions However battery electric vehicles BEVs and plug in hybrid electric vehicles PHEVs have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges which still hampers the market potential of these

vehicles Despite persisting shortfalls mechanisms such as technological learning and economics of scale promise to improve the techno economic performance of BEVs and PHEVs in the short to mid term Here the author seeks to obtain insight into the techno economic prospects of BEVs and PHEVs by i establishing experience curves and ii quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time series analysis The analysis captures the situation in Germany between 2010 and 2016

The Green Transition of the Automotive Industry Anna Cabigiosu,Pietro Lanzini,2023-11-10 This edited collection offers deeper understanding of the green and digital transition in the automotive industry It explains how mobility products services and business models are changing the opportunities and threats correlated to this double transition as well as the competences and resources needed for firms in this fluid scenario The book firstly provides an in depth overview of the strategic and managerial implications for automotive and mobility incumbent firms Chapters describe how sustainable technologies have been changing over time and identify the challenges of the shift imposed by the new competitive environment such as the so called servitization of the industry The second section describes the new drivers of growth and profitability such as open and collaborative innovation and provides guidance on how incumbents can surf this turbulent landscape

Chemical Technology Andreas Jess,Peter Wasserscheid,2020-04-06 A fully updated edition of a popular textbook covering the four disciplines of chemical technology featuring new developments in the field Clear and thorough throughout this textbook covers the major sub disciplines of modern chemical technology chemistry thermal and mechanical unit operations chemical reaction engineering and general chemical technology alongside raw materials energy sources and detailed descriptions of 24 important industrial processes and products It brings information on energy and raw material consumption and production data of chemicals up to date and offers not just improved and extended chapters but completely new ones as well This new edition of Chemical Technology From Principles to Products features a new chapter illustrating the global economic map and its development from the 15th century until today and another on energy consumption in human history Chemical key technologies for a future sustainable energy system such as power to X and hydrogen storage are now also examined Chapters on inorganic products material reserves and water consumption and resources have been extended while another presents environmental aspects of plastic pollution and handling of plastic waste The book also adds four important processes to its pages production of titanium dioxide silicon production and chemical recycling of polytetrafluoroethylene and fermentative synthesis of amino acids Provides comprehensive coverage of chemical technology from the fundamentals to 24 of the most important processes Intertwines the four disciplines of chemical technology chemistry thermal and mechanical unit operations chemical reaction engineering and general chemical technology Fully updated with new content on power to X and hydrogen storage inorganic products including metals glass and ceramics water consumption and pollution and additional industrial processes Written by authors with extensive experience in teaching the topic and helping students understand the complex concepts Chemical Technology

From Principles to Products Second Edition is an ideal textbook for advanced students of chemical technology and will appeal to anyone in chemical engineering Global Marketing Strategy Bodo B. Schlegelmilch, 2022-02-16 This book has been written for experienced managers and students in postgraduate programs such as MBA or specialized master's programs In a systematic yet concise manner it addresses all major issues companies face when conducting business across national and cultural boundaries including assessing and selecting the most promising overseas markets evaluating market entry alternatives and examining the forces that drive adaptation versus standardization of the marketing mix It looks at the various global marketing challenges from a strategic perspective and also addresses topics not usually found in international marketing texts such as aligning marketing strategies with global organizational structures and managing the relationship between national subsidiaries regional headquarters and global headquarters as well as corporate social responsibility challenges and pertinent future trends that are likely to affect global business A guide to suitable video resources giving additional background to this book can be downloaded by all readers by contacting the author Instructors can also obtain additional support material for teaching Please email Bodo Schlegelmilch at WU Vienna using your institutional email and stating your university affiliation More than 400 PowerPoint slides covering the material in each chapter Open Ended Questions A comprehensive multiple choice test bank with solutions **Electric vehicles roll-out in Europe** Friðrik Már Baldursson, Ewa Lazarczyk Carlson, Nils-Henrik M. von der Fehr, 2019-10-16 This report provides a timely contribution to the search for concrete responses on how to successfully complete and manage the roll out of electric vehicles in Europe For this purpose the report presents case studies of three countries Norway and the Netherlands where market penetration of electric vehicles is already comparatively high as well as Luxembourg which is an interesting case from a regulatory perspective The Three Case Studies Norway has some unique characteristics that are important for the study of how electric vehicles affect the electricity system On the one hand the penetration of electric vehicles is higher in Norway than anywhere else in Europe On the other hand thanks to the availability of cheap hydropower the Norwegian electricity system has been designed to support electric space heating in a cold climate Hence it has been able to accommodate high levels of electric vehicle penetration even with relatively light handed regulation on location and capacity of charging infrastructure The unique characteristics of Norway make it difficult to generalise its experience Nevertheless it does suggest that electric vehicles can be accommodated by electricity systems given reasonable levels of penetration and sufficient time to respond to the resulting demand for electricity The Netherlands already has a well developed network of charging points The base for charging is provided by private charging points either at home or at work Semi public chargers with limited access are also an important category that is growing quickly Public chargers are often deployed through a demand driven approach and this method of providing charging infrastructure where there is not enough private parking and therefore a lack of private charging is an option used particularly in cities The Grand Duchy of Luxembourg is a small still developing system in terms of

the number of electric vehicles Luxembourg has organised the development of its charging infrastructure centrally and the main public charging network is owned by distribution companies Due to its location the Duchy cooperates with the Netherlands and Belgium to facilitate the usage of electric vehicles in the region so that users of electric vehicles can charge their cars in any station belonging to the three networks Looking at the three cases Luxembourg has taken a somewhat different approach to creating a charging infrastructure for electric vehicles than the other two countries studied There responsibility for ensuring the deployment of the necessary infrastructure has been vested with electricity network companies who have produced a comprehensive national scheme based on public tenders to ensure a timely rollout Given the relatively low numbers of both electric vehicles and charging points in the country to date it is however not yet clear how well this approach is working especially compared to the alternative pursued in the Netherlands and Norway Both the Netherlands and Norway have adopted more decentralised approaches to charging infrastructure However in both countries such infrastructure has developed in line with the fleet of electric vehicles and charging facilities do not seem to be an obstacle to further growth of the fleet The Norwegian experience is perhaps of particular interest given the unusually high penetration of electric vehicles there The fact that distribution networks are guaranteed financing of necessary upgrades from users has clearly played a part in facilitating the connection of charging points The Netherlands has developed more of a bottom up approach to account for the fact that a large proportion of people live in multi home dwellings without access to a garage or a private parking space Policy implications For the rise of electric vehicles to go smoothly it is crucial that the right incentives and market structures be in place One of the challenges for distribution system operators is to ensure that charging mostly takes place during off peak hours Time of use pricing is a possible option for shifting general demand for charging at or near homes from peak to off peak hours However this may not suffice to solve the localised problems in distribution networks A change in regulation rather than a change in the tariff and pricing structure could be more appropriate in certain cases Electric vehicles or rather their batteries could also potentially provide important storage and flexibility in a decarbonised energy system based in large part on renewable energy sources While time of use tariffs and pricing or command and control regulation would be the appropriate tools to shift charging demand to off peak hours they will not be sufficient to exploit the full potential of electric vehicles as storage One challenge in this regard is simply having enough charging or de charging points for parked vehicles

The Automotive Industry and European Integration A. J. Jacobs, 2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain It delves into how European integration high wages and the demise of GM and Ford led to plant closings in Belgium Next it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry Finally it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape

the geographic footprint of European car production over the next ten years In sum this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations

Electric and Hybrid Vehicles Tom Denton,2016-04-06 The first book on electric and hybrid vehicles EVs written specifically for automotive students and vehicle owners Clear diagrams photos and flow charts outline the charging infrastructure how EV technology works and how to repair and maintain hybrid and electric vehicles Optional IMI online eLearning materials enable students to study the subject further and test their knowledge Full coverage of IMI Level 2 Award in Hybrid Electric Vehicle Operation and Maintenance IMI Level 3 Award in Hybrid Electric Vehicle Repair and Replacement IMI Accreditation C G and other EV Hybrid courses The first book on electric and hybrid vehicles endorsed by the IMI starts with an introduction to the market covering the different types of electric vehicle costs and emissions and the charging infrastructure before moving on to explain how hybrid and electric vehicles work A chapter on electrical technology introduces learners to subjects such as batteries control systems and charging which are then covered in more detail within their own chapters The book also covers the maintenance and repair procedures of these vehicles including fault finding servicing repair and first responder information Case studies are used throughout to illustrate different technologies

Eco-Effectiveness of Modular Products and Fleets within the Automotive Industry Chris David Gabrisch,2023-02-04 The automotive industry is facing the challenge of reducing its environmental impact to comply with stricter fleet emission regulations Still an OEM s contribution to the targets of the Paris Agreement must consider the entire life cycle of a vehicle surpassing the targets of the current legislations which focusses on the use stage only This work presents a concept that identifies the ideal configuration of a modular product system like a vehicle to meet a limited environmental impact at the lowest life cycle costs along the entire life cycle This optimization is based on the ideal combination of modular product components which are selected by an algorithm based on graph theory

Green Biocomposites Mohammad Jawaid,Salit Mohd Sapuan,Othman Y Alothman,2016-11-09 This book addresses different aspects of green biocomposite manufacture from natural fibres and bioplastics including the manufacturing procedures and the physical mechanical thermal and electrical properties of green biocomposites Featuring illustrations and tables that maximize reader insights into the current research on biocomposites it emphasises the role of green technology in the manufacture of biocomposites and analysis of properties of biocomposites for different applications It is a valuable resource for researchers and scientists in industry wanting to understand the need for biocomposites in the development of green biodegradable and sustainable products for different applications

Electric Vehicles: Prospects and Challenges Tariq Muneer,Mohan Kolhe,Aisling Doyle,2017-07-11 Electric Vehicles Prospects and Challenges looks at recent design methodologies and technological advancements in electric vehicles and the integration of electric vehicles in the smart grid environment comprehensively covering the fundamentals theory and design recent developments and technical issues

involved with electric vehicles Considering the prospects challenges and policy status of specific regions and vehicle deployment the global case study references make this book useful for academics and researchers in all engineering and sustainable transport areas Presents a systematic and integrated reference on the essentials of theory and design of electric vehicle technologies Provides a comprehensive look at the research and development involved in the use of electric vehicle technologies Includes global case studies from leading EV regions including Nordic and European countries China and India

Advances in Automotive Production Technology - Towards Software-Defined Manufacturing and Resilient Supply Chains Niklas Kiefl,Frederik Wulle,Clemens Ackermann,Daniel Holder,2023-06-04 This volume of the series ARENA2036 compiles the outcome of the 2nd Stuttgart Conference on Automotive Production SCAP2022 The peer reviewed contributions in this book are arranged thematically in three parts and cover a wide variety of topics A Software defined Manufacturing B Data driven Technologies and C Advanced Manufacturing and Sustainability SCAP2022 was organized by ARENA2036 in close collaboration with the Institute for Control Engineering of Machine Tools and Manufacturing Units of the University of Stuttgart The Conference took place on site from November 16 18 2022 and provided the opportunity for national and international scientists to present their latest research results The conference has taken another big step in becoming an established forum for topics related to the production of the future The great success of this year s conference will be continued with the next SCAP in 2024 with new forward looking topics This is an open access book **Racing Toward Zero**

Kelly Senecal,Felix Leach,2021-06-01 In *Racing Toward Zero* the authors explore the issues inherent in developing sustainable transportation They review the types of propulsion systems and vehicle options discuss low carbon fuels and alternative energy sources and examine the role of regulation in curbing emissions All technologies have an impact on the environment from internal combustion engine vehicles to battery electric vehicles fuel cell electric vehicles and hybrids there is no silver bullet The battery electric vehicle may seem the obvious path to a sustainable carbon free transportation future but it s not the only nor necessarily the best path forward The vast majority of vehicles today use the internal combustion engine ICE and this is unlikely to change anytime soon Improving the ICE and its fuels entering a new ICE age must be a main route on the road to zero emissions How do we go green The future requires a balanced approach to transportation It s not a matter of choosing between combustion or electrification it s combustion and electrification As the authors say The future is eclectic By harnessing the best qualities of both technologies we will be in the best position to address our transportation future as quickly as possible ISBN 9781468601466 ISBN 9781468601473 ISBN 9781468602005 DOI 10 4271 9781468601473 Lemon-Aid New and Used Cars and Trucks 1990-2016 Phil Edmonston,2015-11-21 This book steers buyers through the the confusion and anxiety of new and used vehicle purchases unlike any other car and truck book on the market Dr Phil Canada s best known automotive expert for more than forty five years pulls no punches Handbook on Digital Corporate Communication Vilma Luoma-aho,Mark Badham,2023-05-09 This comprehensive Handbook offers an
