science The focus is on effects of social conditions in particular different forms of social and institutional embeddedness on social outcomes at the macro level Modelling efforts are applied to connect social conditions to social outcomes through micro level behavior in ways that are easily overlooked when argumentation is intuitive and impressionistic The book sets forth a mixed method approach by applying different empirical methods to test hypotheses about similar questions Several contributions re evaluate the theoretical strengths and weaknesses following from the laboratory and field studies Improving the theory in light of these findings facilitates pushing the boundaries of social science
