

Name: _____ Nolan Wang _____

Date: _____ 6-2-23 _____

Student Exploration: Additive Colors

Vocabulary: additive color, cyan, magenta, primary colors, RGB value, secondary color, visible spectrum

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

When white light passes through a prism, it splits into a rainbow of colors. These colors make up the **visible spectrum** shown below.

1. What is the order of colors in the visible spectrum? Red, Orange, Yellow, Green, Blue, Indigo, Violet
2. What do you think would happen if all of the colors of light in the visible spectrum were blended together? They would make a brownish color

Gizmo Warm-up

On a computer or TV screen, all the colors you see are mixtures of only three **primary colors** of light. In the *Additive Colors* Gizmo, you will explore how the primary colors can be mixed to make any color.

1. The primary colors are listed on the left side of the Gizmo.
What are they? Red, Green, Blue
2. Check each box to turn each color on. Notice that the intensity of each color can be adjusted with the slider. What happens to the color if you move the slider to the left?
It gets lighter until it disappears
3. Turn on **Show RGB values at the mouse location**, and move each slider to the right. The **RGB value** gives how much red, green, and blue light is in a given color. Move the cursor over each colored circle. List the RGB values of each pure color below.

Red: 225, 0, 0 Green: 0, 225, 0 Blue: 0, 0, 225

Answer Keys To Additive Colors
