Information Systems: Failure Analysis John A. Wise, Anthony Debons, 2012-12-06 Although system analysis is a well established methodology the specific application of such analysis to information systems is a relatively new endeavor Indeed it may be said to be still in the trial and error stage In recent years such analysis has been given impetus by the numerous accounts of information system failures some of which have led to serious consequences e g the accident at Three Mile Island the chemical spills at Bophal India and at Institute West Virginia and the loss of the space shuttle Challenger Analysis of the failure of the W T Grant Company the third largest retail organization in the United States indicated that improper use of the available information was a significant factor in that failure In spite of these incidents and their widespread impact only meager attempts have been made to develop an effective methodology for analyzing the information systems involved in such incidents There have been no well developed guidelines for determining the causes of such events and for recommending solutions so that similar failures could be avoided To address the need for such a methodology the North Atlantic Treaty Organization NATO sponsored an Advanced Research Workshop attended by a group of 32 scientists scholars and expert investigators representing a variety of disciplines and countries **The Journal of Chemical Physics**, 1963-05

Bibliography of Agriculture, 1974 Cumulated Index Medicus, 1989 Polyelectrolytes E. Sélégny, 2012-12-06 This book contains a number of articles inspired by the NATO Advanced Study Institute on Charged and Reactive Polymers I held in France in June 1972 This general title indicates simply the intention of a series The meeting dealt mainly with the fundamental problems of the physical chemistry of polyelectrolytes in solution Some of the articles reproduce the lectures exactly as they were delivered Some others have been modified to a greater or lesser extent and this as a result of improvements or new inspiration arising from comments and discussions In previous larger conferences on macromolecules polyelectrolytes constituted only a marginal problem and few were the individual communications or short was the time allotted to this subject In other meetings of a biophysical character the uses of the techniques of charged macromolecules have been exposed with less attention given to the theories or to the creation or interpretation of these techniques AU of us felt that the time had come to enumerate and to evaluate this increasing science of polyelectrolytes which has become of major interest During the whole period of the Institute physical chemists discussed their mutual problems for more than a week and of ten far into the night One of the advantages of such an Institute is to enable the Directors and the members of the Scientific Committee to establish a logical order in the lectures this order has been respected in the present edition

Training & Education for Public Health Robert G. Harmon, 1996 Multi-Objective Optimization Gade Pandu Rangaiah, 2009 Optimization has been playing a key role in the design planning and operation of chemical and related processes for nearly half a century Although process optimization for multiple objectives was studied by several researchers back in the 1970s and 1980s it has attracted active research in the last 10 years spurred by the new and effective techniques

for multi objective optimization In order to capture this renewed interest this monograph presents the recent and ongoing research in multi optimization techniques and their applications in chemical engineering Following a brief introduction and general review on the development of multi objective optimization applications in chemical engineering since 2000 the book gives a description of selected multi objective techniques and then goes on to discuss chemical engineering applications These applications are from diverse areas within chemical engineering and are presented in detail All chapters will be of interest to researchers in multi objective optimization and or chemical engineering they can be read individually and used in one s learning and research Several exercises are included at the end of many chapters for use by both practicing engineers and students
