Haladyna,1994 This is the most current and comprehensive book devoted to item writing It addresses the related topics of multiple choice test item development and validation of responses to these test items two critical steps in the development of any cognitive test In so doing the volume provides a conceptual basis for item writing reviews the issue of constructed versus selected response testing presents a variety of formats provides guidance in developing items as well as a basis for reviewing evaluating and improving items and speculates about the future of item development and validation This book helps readers better understand the concepts principles and procedures available to build better test items that will lead to more reliable tests of ability and achievement *Assessment In The Classroom* George Cunnningham,2005-08-09 Educational assessment at one time a relatively uncontroversial subject is now riven by a diversity of views The most crucial division is between those who continue to believe in the effectiveness of objective assessment techniques and those who favour alternative methods This book presents an analysis of the strengths weaknesses and rationales for both **Computing, Control, Information and Education Engineering** Hsiang-Chuan Liu,Wen-Pei Sung,Wenli Yao,2015-08-18 This proceedings set contains selected Computer Information and Education Technology related papers from the 2015 International Conference on Computer Intelligent Computing and Education Technology CICET 2015 to be held April 11 12 2015 in Guilin P R China The proceedings aims to provide a platform for researchers engineers and academics *Web-based Collaborative Learning* James Belanich,2003 Students linked into a learning environment over the Internet may learn topics better by collaborating to create questions and answers In research reported here students used a learning aid for collaborative question generation called Army TEAMThink a commercial program modified for Army use under a TRADOC Delivery Order contract Research was done at three US Army schools to assess the quality or doctrinal correctness of questions and answers generated by students and to measure any learning benefit Students first completed a tutorial on how to write effective multiple choice questions Next students wrote questions and reviewed questions written by other students Based on the feedback from the reviews authors were allowed to modify their own questions Finally students took a test of the questions that had been developed by students using the learning aid Army subject matter experts judged that most of the questions developed were considered acceptable and could be repurposed for use in course exams A majority of the question feedback was constructive

indicating that the collaborative process was helpful. Students who went through the process scored higher on a test of novel questions than those who did not use Army TEAMThink. They also scored higher than students who went through the process on a different topic from the test topic, demonstrating a moderate learning effect. The general finding of this research about a collaborative question generation approach is that instructors can accumulate quality multiple choice questions and monitor student comprehension, and students have an additional opportunity for better learning.
