Advanced Social Media Literacy:

Fake News and Information Disorder in the Era of Advance Information Technology Adeyinka Tella, Oluwale O Durodolu, 2025-09-01 Information pollution on a worldwide scale is a new phenomenon brought on by the advancement of modern advanced social information technology. The long term effects of disinformation efforts are the most concerning because they are difficult to evaluate in terms of their direct and indirect effects. Information disorder also known as misinformation, disinformation and malinformation is currently wreaking havoc in our society. It is defined as the spreading or development of inaccurate information with or without the aim to harm. Due to the extensive harm it has already done on all of these levels politically, economically, culturally, socially, spiritually and even psychologically, immediate action is required to stop the situation. As a result, the book *Fake News and Information Disorder in the Era of Advance Information Technology* is an effort to thoroughly examine information disorder, its related challenges, the role that libraries and other information organizations can play and to outline approaches to addressing information pollution. Realities, Challenges, Visions? In an age of globalisation, digitisation and growing nationalism, there is a particular need to inquire into the notion of responsibility and available spaces of action. How can strategies and networks for successful international and intercultural cooperation be drawn up and what role do civil society actors play? *The Palgrave Handbook of Media Misinformation* Karen Fowler-Watt, Julian McDougall, 2022-12-12 The Palgrave Handbook of Media Misinformation provides a comprehensive and cutting edge resource on the critical debates surrounding fake news and misinformation online. Spanning all continents and linking academic, journalistic and educational communities, this collection offers authoritative coverage of conspiracy theories, the post Trump and Brexit landscape and the role of big tech in threats to democracy and free speech. The collection moves through a diagnosis of misinformation and its impacts on democracy and civic societies, the mainstreaming of conspiracy theory, the impacts of misinformation on health and science and the increasing significance of data visualization. Following these diagnoses, the handbook moves to responses from two communities of practice: the world of journalism and the field of media literacy. **Digital Citizenship and Building a Responsible Online Presence** Rahman, Hakikur, 2025-03-20 In a connected world, understanding how to navigate the digital landscape responsibly is essential for individuals of all ages.
