Willingham,Nancy S. Cole,2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify

patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience *Tests in Print* Linda L. Murphy, Jane Close Conoley, James C. Impara, 1994 *Private Secondary Schools: Traditional Day and Boarding Schools* Peterson's, 2011-05-01 Peterson's Private Secondary Schools Traditional Day and Boarding Schools is everything parents need to find the right day or boarding private secondary school for their child Readers will find hundreds of school profiles plus links to informative two page in depth descriptions written by some of the schools Helpful information includes the school's area of specialization setting affiliation accreditation subjects offered special academic programs tuition financial aid student profile faculty academic programs student life admission information contacts and much more

Democracy, Multiculturalism, and the Community College Robert A. Rhoads, James R. Valadez, 2016-05-06 Based on five organizational case studies this book argues that community colleges face an identity crisis and must find ways of balancing the three traditional roles typically assumed by them transfer vocational and community education To emphasize one at the expense of another is to fail to meet the diverse needs of students who look to the community college as a source of opportunity and social mobility In addition community colleges must create an organizational context in which opportunities exist for culturally diverse students to participate as full members in the educational process The study uses democratic educational strategies first suggested by John Dewey as a foundation for developing a critical multicultural view of community college education The authors argue that critical multiculturalism moves beyond liberal views of cultural diversity and challenge academic institutions to take advantage of the varied experiences and perspectives that students from other cultures bring to education The book includes a reference section following the final chapter and a name and subject index

Choosing Students Wayne Camara, Ernest W. Kimmel, 2005-03-23 This volume brings a variety of perspectives to bear on the issue of how higher education institutions can or should choose students during the early part of the 21st century Many of the contributors report on research to develop and validate potential tools to assist those responsible for admission decisions Other contributors however pose broader questions about the nature of selective admissions about institutional responses to the changing demography of those seeking to enter higher education or about the appropriate criteria of success in higher education The volume is particularly timely because the question of how changes in admission tools and processes will affect campus diversity following the recent Supreme Court decision concerning the University of Michigan Diversity is an important concern of all of the contributors and the chapter by Lee Bollinger President

at Michigan at the time the court cases were filed is particularly relevant This book brings together the research that underlies a variety of proposed approaches to improving the selection of students Providing support for the integrity of the admissions process and the validity of new tools to help a higher education institution to select a diverse student body this book explores the implications of the assessment component of K 12 school reform for higher education admissions practices The diverse contributions to this volume reflect the current ferment in educational research and educational practice as institutions of higher education seek to develop a new admissions paradigm for coming decades following the University of Michigan decisions This book is intended for those leaders and professionals who set admission policies and practices in American colleges and graduate and professional schools as well as for those scholars and scientists who research develop and validate tools for use in the process of choosing students in ways that are congruent with an institution's mission values and goals

Assessing Student Outcomes - Why, Who, What, How? J. Fredericks Volkwein, 2011-11-22 This volume offers administrators and practitioners a summary guide to assessment in higher education from the reasons for undertaking assessment to the delivery of findings It opens with the questions that precede an effective study and drive research design To what extent is the study aimed at educational improvement and to what extent is it aimed at external accountability Are the results expected to demonstrate goal attainment improvement comparison to others meeting standards cost effective investment What is the population from whom assessment data are being collected Are we measuring the knowledge and skills of individuals and making decisions about their remediation certification or development Or are we sampling from particular groups of students and comparing them to each other or perhaps to themselves over time The core of the volume is devoted to the objects of assessment basic skills general education knowledge attainment in the major personal growth attitudes and satisfaction and alumni outcomes keeping in mind both cognitive and noncognitive measures One chapter describes common obstacles to effective assessment others describe conceptual models research methods and data collection strategies and instruments The concluding chapter underscores the importance of communicating research results effectively This is a special volume of the Jossey Bass higher education quarterly report series New Directions for Institutional Research Always timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management
