Mathematical Book Histories Philip Beeley,Ciarán Mac an Bhaird,2024-08-12 This book both articulates and responds to increasing scholarly interest in the materiality of the book Taking as its base the unique collection of mathematical books in the Russell Library at Maynooth it addresses questions related to printing techniques and print culture book production provenance and reading practices It considers the histories of individual items of the Russell Collection their previous locations and owners and explores ways in which annotations underlinings hand drawn diagrams and the like reveal patterns of reading and usage Finally it seeks to elicit more information on a previously under researched topic the historical role of mathematics in the extensive network of Irish colleges that once covered Catholic Europe located in places such as Salamanca Rome Douai and Prague Alongside delivering important new insights into print culture as a medium for transmitting scientific ideas Mathematical Book Histories is thus also intended to contribute to a broader understanding of the role and significance of mathematics in the context of clerical instruction and more broadly in the academic tradition of Ireland up to the beginning of the twentieth century Many of the volumes in the Russell Library reflect the remarkably rich book trade that flourished in seventeenth and early eighteenth century Dublin and which was quite distinct from that in London Booksellers often bought in their wares directly from abroad with the result that publications could enter collections that did not enter the purview of contemporary English or Scottish scholars in Britain

Math Is Easy So Easy, Algebra I Nathaniel Max Rock,2008-02 There are many self help math books available but none are quite like this one Math Is Easy So Easy first separates math topics into those which are essential and nonessential The struggling math student and parent of a struggling math student must be able to focus on the math topics which will return the greatest effect in the shortest amount of time Furthermore math teachers and math textbooks simply try to cover too much material the bulk of which has no impact on a student s successful completion of math up through calculus in high school Second Math Is Easy So Easy tries to provide clarity of instruction for a few problems which cover the important aspects of the essential topics Contrary to most math teacher instruction it is more important and beneficial to know a few key problems well than to try to cover many problems only superficially If you are the parent of a student who is struggling in math you know how frustrating it can be to get to the bottom of what your student really needs to know to survive and persist in math up through calculus in high school You also know how important it is that your student stay in math as long as possible in high school so that they are better prepared to enter and succeed in college You also no doubt know how

seemingly unreasonable your struggling student's math teacher can be in terms of communicating with you and your student. As a math teacher for many years now, Max wrote this book to help you and your struggling math student survive math with as few I hate math outbursts as possible. Lastly, Max has personally witnessed many students who struggle in math in high school who then go on to mature into great engineers and scientists. This book will help your student to stay in math longer and be more successful. There is a separate book for each of six math classes: 7th Grade Math, Algebra I, Geometry I, Algebra II, Math Analysis, and Calculus. There is a single Combo book with all six books in one. Make sure you get the right book for your needs. Nathaniel Max Rock, an engineer by training, has taught math in middle school and high school, including math classes: 7th Grade Math, Algebra I, Geometry I, Algebra II, Math Analysis, and AP Calculus. Max has been documenting his math curricula since 2002 in various forms, some of which can be found on MathForEveryone.com, StandardsDrivenMath.com, and MathIsEasySoEasy.com. Max is also an AVID elective teacher and the lead teacher for the Academy of Engineering at his high school.
