academic standing Contemporary bordering processes and practices are examined through the borderscapes lens to uncover important connections between borders as a challenge to national and EU policies and borders as potential elements of political innovation through conceptual re framings of social political economic and cultural spaces The authors offer a nuanced and critical re reading and understanding of the border not as an entity to be taken for granted but as a place of investigation and as a resource in terms of the construction of novel geo political imaginations social and spatial imaginaries and cultural images In so doing they suggest that rethinking borders means deconstructing the interweaving between political practices of inclusion exclusion and the images created to support and communicate them on the cultural level by Western territorialist modernity The result is a book that proposes a wandering through a constellation of bordering policies discourses practices and images to open new possibilities for thinking mapping acting and living borders under contemporary globalization
