This edition compiles London's essential short stories and novellas, delivering a comprehensive exploration of his thematic preoccupations and the literary traditions of naturalism and adventure writing that characterize his work. New Zealand is a unique and fascinating country as a case study for managing invasive species. Because of its history, we know a lot about species introductions, and because of its geographical position as a relatively small, remote island, the potential for dealing with invasive species may be more effective than elsewhere. Moreover, the fragility of its ecosystems makes it relatively easy

to see the impact of one species upon another Nature and people shape the country's ecology from its geological and biological beginnings to the relatively recent arrival of people and the changes wrought to the wide ranging efforts of individuals and communities to protect and enhance treasured species and environments Among them an ambitious Predator Free 2050 initiative to rid the country of some of its unwanted species The issue is a complex and interesting one There are ethical considerations which species are protected and which destroyed How are they destroyed What are the unforeseen consequences There are also tensions between preservation and the use of natural resources and ultimately our relationship to the environment how we live A Land Before Humans a Land After Humans explores these issues An invaluable resource for environment ecology animal welfare and ethics students researchers and policy makers the book takes New Zealand as a case study and looks at the practical and ethical considerations of dealing with invasive species 5m Books Unbreaking
