Educating Young Children With and Without Exceptionalities Tachelle Banks, Festus E. Obiakor, Jessica Graves, Anthony F. Rotatori, 2019-02-01 Early childhood education ECE has always been intertwined with the use of developmentally appropriate practice DAP To support excellence in ECE it is critical how the knowledge about individual children and child development principles combined with the knowledge of effective early learning practices Effective early childhood education involves an interdisciplinary collaborative process that is influenced by many factors We present these aforementioned realities in Educating Young Children With and Without Exceptionalities New Perspectives In addition we argue that general and special educators need to focus on applying new knowledge to better address critical issues that advance the field of educator preparation and improve educational outcomes for young children Early childhood research confirms the need for intensive intervention and remedial education we need to avoid approaches that are too little or too late Also proven to yield positive results for children are practices familiar to early childhood educators These practices include relationship based teaching and learning partnering with families adapting teaching for children from different backgrounds and for individual children active meaningful and connected learning and smaller class sizes Evidence of the benefits of these practices suggests that they should be extended more widely into the elementary grades
