Algebra Readiness Educators:

Reaching Algebra Readiness (RAR) Tony G. Williams, 2011-10-30 Research has shown that algebra is the doorway and gateway for future success of students in many aspects including high school graduation attending and success in college and professional earning power And the most important key to students success in algebra is their readiness This book is not only a program that addresses algebra readiness it is also a fundamental reform effort based on the National Mathematics Advisory Panel's NMAP's Final Report spring 2008 The book approaches mathematic skills deficiencies on an individual basis much like an IEP addresses the individual needs of a student with disabilities The Reaching Algebra Readiness RAR process consists of four components 1 Diagnostic assessing student's mastery of the skills needed to take algebra 2 Prescriptive developing an individualized plan to address specific math deficiencies 3 Intervention utilizing tools and resources parental involvement effective teaching strategies etc to improve students mathematics skills and 4 Drills and Effective Teachings Strategies mathematics is a discipline and simply there is no way of avoiding practice and drilling in reaching algebra readiness which can be enhanced significantly by implementing proven effective teaching strategies The Reaching Algebra Readiness RAR process and the related materials presented in this book will be revolutionary in helping all students acquire the math skills needed for success in algebra and beyond This book is a must guide for math teachers parents who home school parents who are looking for solutions and educators pursuing fundamental education reforms Large-Scale Studies

in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

Mathematicians and Education Reform, 1989-1990 Naomi Fisher, Harvey Keynes, Philip Wagreich, 1991 Educational issues are receiving a great deal of attention in the mathematical sciences community as concern rises over the quality of instruction in the nation's schools colleges and universities Insuring a mathematically literate population and increasing the number of students pursuing careers in mathematics science and engineering are high on the list of priorities

Mathematicians can make important contributions to the educational reform process The present volume is the second in the series Issues in Mathematics Education launched in 1990 by the Conference Board of the Mathematical Sciences and published by the AMS and the Mathematical Association of America The purpose of the series is to stimulate the flow of information among mathematical scientists education specialists and teachers about innovative efforts to revitalize mathematics education Compiled and edited by the directors of the Mathematicians and Education Reform MER Network this book contains papers by speakers and participants in MER workshops and special sessions over the last three years Like the first volume which also grew out of an MER workshop this book is organized into two sections Projects and Issues and Reactions providing a balance between descriptions of successful existing projects and more in depth discussion of problems and issues in mathematics education reform With contributions by some of the major leaders in this area today this book will likely be of interest to a broad segment of the mathematical sciences community
