

Graphing Lines Stained Glass Window Activity

Rewrite each function in slope-intercept form and place your answer in the blank. Then graph each line on the coordinate plane given. Extend each line to the outside of the frame and label each line with the problem number. After graphing all the lines, use colored pencils or markers to color each section of the graph, creating a stained glass window.

Your Daily Math Laura Laing, 2016-06-03 Do not worry about your difficulties in mathematics I can assure you that mine are still greater Albert Einstein Everyone has heard students most common complaint in math class Why do I need to learn this I'll never use it when I'm older Some of us have even been that complainer Many people's difficulties with learning math in school follow them into adulthood by which time they often assume that it's too late to do anything about it But even though it's true that the average person has no need in daily life to remember what the number for Pi is and what it represents that doesn't mean that math serves no purpose for anybody with access to a calculator In *Your Daily Math* veteran math educator Laura Laing lays out a year's worth of exercises meant to get you thinking about math in a different way Laing's approach breaks down her 366 exercises into seven categories one for each day of the week Number Sense Algebra Geometry Application Probability Statistics Logic and Grab Bag Laing's approach treats these math and various number related logic problems as fun brain exercises Yes there are equations here but nothing that the average adult even those who always hated math class can't handle There are also graphs geometry statistics and logic problems many of them centered around problems that could occur in real life Think of *Your Daily Math* not as homework but instead as your daily cognitive workout

The Bachelor of Arts John Seymour Wood, 1896

Great Circles Emily Rolfe Grosholz, 2018-11-13 This volume explores the interaction of poetry and mathematics by looking at analogies that link them The form that distinguishes poetry from prose has mathematical structure lifting language above the flow of time as do the thoughtful ways in which poets bring the infinite

into relation with the finite The history of mathematics exhibits a dramatic narrative inspired by a kind of troping as metaphor opens metonymy and synecdoche elaborate and irony closes off or shifts the growth of mathematical knowledge The first part of the book is autobiographical following the author through her discovery of these analogies revealed by music architecture science fiction philosophy and the study of mathematics and poetry The second part focuses on geometry the circle and square launching us from Shakespeare to Housman from Euclid to Leibniz The third part explores the study of dynamics inertial motion and transcendental functions from Descartes to Newton and in 20th c poetry The final part contemplates infinity as it emerges in modern set theory and topology and in contemporary poems including narrative poems about modern cosmology
