Palestine (West Bank and Gaza) Education System and Policy Handbook

Volume 1 Strategic Information and Developments IBP, Inc., 2008-03-03 Palestine Education System and Policy Handbook

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While

decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

The Politics of Education in Developing Countries Sam Hickey, Naomi Hossain, 2019-02-21 Why have many developing countries that have succeeded in expanding access to education made such limited progress on improving learning outcomes There is a growing recognition that the learning crisis constitutes a significant dimension of global inequality and also that educational outcomes in developing countries are shaped by political as well as socio economic and other factors The Politics of Education in Developing Countries focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries Bangladesh Cambodia Ghana Rwanda South Africa and Uganda The problem of education quality is serious across the Global South The Politics of Education in Developing Countries From Schooling to Learning deploys a new conceptual framework the domains of power approach to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes The domain of education is prone to being highly politicized as it offers an important source of both rents and legitimacy to political elites and can be central to paradigmatic elite ideas around nation building and modernity Of

particular importance is the relative strength of coalitions pushing for access as against those focused on issues of higher quality education This book concludes with a discussion of entry points and strategies for thinking and working politically in relation to education quality reforms and critical commentaries

Fixing the Foundation Rythia Afkar,Tara Beteille,Mary Breeding,Toby Linden,Andrew Mason,Aaditya Mattoo,Tobias Pfutze,Lars Sondergaard,Noah Yarrow,2023-12-27 Countries in middle income East Asia and the Pacific were already experiencing serious learning deficits prior to the COVID 19 pandemic COVID related school disruptions have only made things worse Learning poverty defined as the percentage of 10 year olds who cannot read and understand an age appropriate text is as high as 90 percent in several countries Several large Southeast Asian countries consistently perform well below expectations on adolescent learning assessments This report examines key factors affecting student learning in the region with emphasis on the central role of teachers and teaching quality It also analyzes the role education technologies which came into widespread use during the pandemic and examines the political economy of education reform The report presents recommendations on how countries can strengthen teaching to improve learning and in doing so can enhance productivity growth and future development in the region

Setting Consensus Goals for Academic Achievement James Pellegrino,Laurens Wise,Nambury Raju,2014-10-13 This special issue is based on a workshop which began with a description and examination of the current National Assessment of Educational Progress NAEP standard setting model then looked to standard setting applications outside of education These applications included those that focus on human performance and the adequacy of human performance in these contexts raters were asked to focus on the knowledge and skills that underlie competent performance Researchers also examined applications that focus on the impact of environmental agents on life and the ecology in these cases raters began with the knowledge that more or less of a substance is better and as for NAEP the judgment task was to determine how good is good enough They wished to examine parallels in the objectives empirical grounding judgmental requirements and policy tensions for standard setting in NAEP and in other domains These papers were commissioned to examine the current state of affairs and residual issues with respect to achievement level setting in NAEP and to help determine whether the models and methods used in other disciplines have useful application to education It is important to note that the papers represent the authors views not necessarily those of the committee or National Research Council This issue and the workshop discussion point out a number of analogies between the objectives requisite data judgment requirements and policy issues for NAEP and other applications The editors hope that this issue and wide distribution of these papers will prompt others to join in this interesting analysis and debate
