Clinical Decision Making for Adult-Gerontology Primary Care Nurse Practitioners Thanavaro, Karen S.

Moore, 2016-03-15 Clinical Decision Making for Adult Gerontology Primary Care Nurse Practitioners provides a systematic approach to clinical decision making for a wide variety of commonly encountered primary care issues in adult and geriatric practice. Unlike other textbooks, it details a progressive approach to handling such issues by focusing on the complete visit from history intake through management and follow-up care. The goal of this text is to enable students to learn a systematic approach to clinical problems and use evidence-based guidelines to direct their management decisions. Designed for both the student and the newly practicing NP, this text serves as a guide to increase the practitioner's confidence with the application of assessment skills, diagnostic choices, and management approaches. Throughout the text, students will find guidelines for the adult gerontology nurse practitioner role as well as real-life case studies that demonstrate what an NP may encounter in the clinical practice environment. The text is written at an application level, employs up-to-date evidence-based literature, and features practice questions, all of which make this a strong resource for certification preparation. The Cardiac Care Unit Survival Guide

Herzog, 2012 This book is geared toward cardiologists, trainees, and housestaff, anyone who rotates or practices in the CCU who must grasp the subtleties when treating patients in a cardiac care unit. It is organized in a way to help you understand the simplified pathophysiology of the disease, the diagnosis modalities, the initial critical care management in the CCU, the clinical care in a step-down unit, and plan for discharge therapy. Dr. Herzog has developed unified pathways for the management of patients presenting with acute chest pain or its equivalent, acute heart failure, atrial fibrillation, and flutter, syncope, cardiac arrest, hypertension, and hyperglycemia. Algorithms and pathways for management are provided in each chapter for easy implementation in any health care system. In addition, because specialized units are frightening to the patients and their families, there is a section in each chapter on what the patient and family need to know that encompasses a capsule explanation of the condition and treatment management. A companion website accompanies the text that includes fully searchable text and patient information. *Manual of Veterinary Transfusion Medicine and Blood Banking*
