Propaganda and Power in the Age of Globalization Simon Sherratt, 2024-08-15 Following victory in World War II the US and Western Europe claimed to be the champions of the political ideals of democracy and freedom along with the economic ideal of free market capitalism Two decades into the

twenty first century these once noble ideals have been reduced to little more than myths myths that bear scant resemblance to the realities of the powerful political and economic forces that dominate the Western world This book examines the dangerous prospects we face as the societies built upon these myths begin to fragment and crumble In an open and accessible style this book argues that much of the confusion that currently plagues the West is due to the fact that its social economic and political systems are saturated by a little understood and rarely acknowledged system of propaganda This book seeks to clear away this propagandistic facade in order to reveal where power really lies in Western societies examining how this power functions and how it has corrupted the ideals of democracy freedom and capitalism to suit its own ends This volume will be of value to those interested in modern history and social and political history *Hearings, Reports and Prints of the Joint Economic Committee* United States. Congress. Joint Economic Committee,1967 Central Banking at the Frontier Thammarak Moenjaj,2024-09-27 With a foreword by Sethaput Suthiwartnarueput Governor of the Bank of Thailand Central Banking at the Frontier Creating a Digital Financial Landscape comprehensively explores the current digital dynamic era providing insights into the debates that define the evolving financial landscape *Hearings, Reports and Prints of the Senate Committee on Foreign Relations* United States. End-to-End Strategy Execution Charles F. Bowman,William M. Ulrich,2025-12-10 Despite technological and methodological advancements strategy execution failure remains alarmingly common Most projects fail outright or face significant challenges a statistic that has remained consistent for more than two decades While 80% of business leaders believe their companies excel at crafting strategy only 44% believe their organizations can achieve their strategic goals Nine out of ten leaders admit their execution failures have resulted in missed market opportunities These initiatives that fell short of expectations and ROI have wasted hundreds of billions of dollars Organizations continue this cycle of failure by repeatedly investing in new methodologies third party software systems integrators or silver bullet technologies expecting different results This suggests a fundamental abdication of ownership and responsibility for effective strategy execution Too many organizations fall into the trap of blind loyalty to specific methodologies sometimes abandoning proven practices and even strategic planning itself While various methodologies offer valuable elements leadership must maintain intellectual oversight rather than delegating accountability to third parties with limited stake in long term success End to End Strategy Execution From Inception Through Solution Deployment presents a framework for change to break this cycle of failure This framework is effective because it is methodology agnostic but not methodology illiterate This means it incorporates valuable elements from various approaches while maintaining a cohesive structure that connects strategy formulation to solution deployment This end to end strategy execution framework provides an actionable roadmap covering Strategy formulation Impact assessment Business and IT architecture design Initiative scoping and prioritization Design driven solution deployment Unlike previous frameworks claiming to be end to end this approach incorporates the rigor and integration capabilities

needed to deliver on its promise aligning best practices and technologies to streamline every action from strategy to implementation Because the framework addresses every aspect of strategy execution this book is a must read for everyone involved in strategy formulation analysis design and deployment It enables all strategic stakeholders and contributors to understand the scope and extent of their responsibilities as well as the tasks required to deliver any strategic solution on time and within budget

The Great Reset Mark Hodgins,2009-11 The Great Reset is a riveting and detailed view of the current financial atrocity and the economic path of a continent that is in the process of playing its last hand as a global leader In a detailed and critical assessment of the global economic state The Great Reset courageously challenges the rhetoric of the financial media The Great Reset openly reveals the entangled web of the financial world and government and their plan to continue their personal objectives at the demise of the masses The economic path currently being driven by an elite group of financial decision makers will affect the decisions made in the boardroom of big business and the living rooms of everyday investors This is a must read for business leaders and those consumers invested in the global markets to better understand the basis of the crisis and the future that is being determined by the policy enactments and decisions of global governments The Great Reset provides critical guidance to anyone planning their economic or corporate future and will shape your views and provide a clear assessment of the current business climate and how to move forward in this economy

China and the 21st Century Crisis Minqi Li,2015-10-20 The USA is widely seen as the country at the centre of the recent economic crash But will this be the case the next time the system goes into shock This book analyses how the political and economic imbalances in China will exacerbate system collapse and how this could happen much sooner than we imagine possibly within a decade By looking at the big questions of class struggle global economic imbalances peak oil climate change and political power play Minqi Li argues that by the time of the next crisis China will be at the epicentre of these contradictions China is the last large region and source of cheap labour into which capital could expand the system is at its limits By combining this argument with issues surrounding the planet s ecological limits and the internal politics of the Chinese Communist Party Li commands a narrative of China at a pivotal and possibly apocalyptic stage

The Pivotal Generation Henry Shue,2022-01-11 We all recognize that climate change is a supremely important issue of our time which requires both trans national and trans generational collaboration and shared responsibility What we haven t yet fully appreciated argues political philosopher Henry Shue are the ethical considerations surrounding the fact that the next one or two decades will determine whether climate change which already has led us to dangerous effects will surge into inescapably disastrous effects The people alive today thus represent a pivotal generation in human history For the past two centuries humans have undermined our climate at an increasing rate in ways that the present generations are the first to fully understand and the last to be able to reverse But our responsibility for decisive and immediate action rests on three special features of the relation of our present to the future that many have failed to realize 1 future generations face dangers greater than ours even

if we act robustly 2 the worsening dangers for future generations are currently without limit and 3 a less robust effort by us is likely to allow climate change to pass critical tipping points for severely worse and potentially unavoidable future dangers Shue a renowned scholar of ethics politics and international relations who has been studying the ethics of climate change for the last two decades guides us through what our ethical responsibilities to others are both across the world but especially over time and what those commitments require us to do in addressing the climate change crisis now and forcefully
