

ACIDS, BASES, & THE pH SCALE

Name: **Answer Key**

Date: _____

Pd: _____

PART 1: ACIDS AND BASES

Comparing Acids and Bases	
Acids	Bases (Alkalines)
• Sour taste, leaves burning sensation • Increase hydrogen ions (H^+) in solution • Example: HCl $H^+ + Cl^-$ • Turns litmus (pH) paper to red	• Sharp bitter taste, feels slippery to touch • Decrease hydrogen ions (H^+) in solution (Increase hydroxide ions (OH^-) in solution) • Example: NaOH $Na^+ + OH^-$ • Turns litmus (pH) paper to blue

PART 2: THE pH SCALE

- The **pH Scale** is a **measurement** of how acidic or how basic a solution is.
- The scale goes from **0** to **14**.
- **Compounds** are **acidic** if they have a pH **lower** than **7**.
- Compounds with a pH **higher** than **7** are **basic** or **alkaline**.
- Compounds with a pH **of 7**, are **neutral**.

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14

Increased concentration of **H^+** ions
Decreased concentration of **OH^-** ions

Decreased concentration of **H^+** ions
Increased concentration of **OH^-** ions

pH below 7 = **acids**

pH at 7 = **neutral**
(**pure water**)

pH above 7 = **bases**

PART 3: BUFFERS

- A **buffer** is a **weak acid** or **base** that **prevents** sudden **changes** in pH.
 - Maintains **homeostasis**
- A buffer works by **binding** to H^+ ions **releasing** H^+ ions when the solution pH changes.
- Buffers **bind** to H^+ ions when the **concentration** of H^+ ions in solution **increases**.
- **NaOH** **$Na^+ + OH^-$** (The OH^- will bind to H^+ ions to form H_2O – **neutralization**)
- Buffers **release** H^+ ions when the **concentration** of H^+ ions in solution **decreases**.
HCl **$H^+ + Cl^-$**

20 Acids And Bases Answer Key:

General Chemistry Donald A. McQuarrie, Stanley Gill, 2011-06-15 This Fourth Edition of McQuarrie's classic text offers a thorough revision and a quantum leap forward from the previous edition. Taking an atoms first approach it promises to be another ground breaking text in the tradition of McQuarrie's many previous works. This outstanding new text available in a soft cover edition offers professors a fresh choice and outstanding value.

Physical Chemistry for Engineering and Applied Sciences Frank R. Foulkes, 2012-09-12 Physical Chemistry for Engineering and Applied Sciences is the product of over 30 years of teaching first year Physical Chemistry as part of the Faculty of Applied Science and Engineering at the University of Toronto. Designed to be as rigorous as compatible with a first year student's ability to understand the text, it presents detailed step by step derivations of the equations that permit the student to follow the underlying logic and of equal importance to appreciate any simplifying assumptions made or mathematical tricks employed. In addition to the 600 exercises and end of chapter problems, the text is rich in worked non trivial examples many of which are designed to be inspiring and thought provoking. Step by step derivation of all equations enables the student to smoothly follow the derivation by sight and can be understood relatively easily by students with moderate skills and backgrounds in mathematics. Clear and accessible Physical Chemistry for Engineering and Applied Sciences includes The answers to all of the 112 worked examples, 99 exercises following many of the worked examples and 496 end of chapter problems. Topics not normally seen in introductory physical chemistry textbooks: ionic reaction rates, activities and activity coefficients or not regularly explained in much detail, electrochemistry, chemical kinetics with an eye on industrial applications. Special appendices that provide detailed explanations of basic integration and natural logarithms for students lacking a background in integral calculus. An in depth chapter on electrochemistry in which activities and activity coefficients are used extensively as required for accurate calculations.

Chemistry (Teacher Guide) Dr. Dennis Englin, 2018-02-26 This book was created to help teachers as they instruct students through the Master's Class Chemistry course by Master Books. The teacher is one who guides students through the subject matter, helps each student stay on schedule and be organized and is their source of accountability along the way. With that in mind, this guide provides additional help through the laboratory exercises as well as lessons, quizzes and examinations that are provided along with the answers. The lessons in this study emphasize working through procedures and problem solving by learning patterns. The vocabulary is kept at the essential level. Practice exercises are given with their answers so that the patterns can be used in problem solving. These lessons and laboratory exercises are the result of over 30 years of teaching home school high school students and then working with them as they proceed through college. Guided labs are provided to enhance instruction of weekly lessons. There are many principles and truths given to us in Scripture by the God that created the universe and all of the laws by which it functions. It is important to see the hand of God and His principles and wisdom as it plays out in chemistry. This course integrates what God has told us in the context of this study.

Features Each suggested weekly schedule has five easy to manage lessons that combine reading and worksheets Worksheets quizzes and tests are perforated and three hole punched materials are easy to tear out hand out grade and store Adjust the schedule and materials needed to best work within your educational program Space is given for assignments dates There is flexibility in scheduling Adapt the days to your school schedule Workflow Students will read the pages in their book and then complete each section of the teacher guide They should be encouraged to complete as many of the activities and projects as possible as well Tests are given at regular intervals with space to record each grade About the Author DR DENNIS ENGLIN earned his bachelor s from Westmont College his master of science from California State University and his EdD from the University of Southern California He enjoys teaching animal biology vertebrate biology wildlife biology organismic biology and astronomy at The Master s University His professional memberships include the Creation Research Society the American Fisheries Association Southern California Academy of Sciences Yellowstone Association and Au Sable Institute of Environmental Studies
