Frits Thaulow Fritz Thaulow, 1986 **Landscape and Nature in Scandinavian Art** MaryClaire Pappas, Tonje

Haugland Sørensen, 2025-04-16 This edited volume foregrounds new and vital scholarship shaping Scandinavian art historical research on the representations of the natural world Contributors deconstruct the interlinking of people and land through critical readings of the Scandinavian representation of nature bringing to the fore how the traditional focus on the landscape as a manifestation of temperament has tended to obfuscate critical approaches to the representation of the landscape Making interdisciplinary connections this volume redresses the imbalance in scholarship on the region that often emphasizes teleological national narratives and instead situates encounters with nature and the landscape in relationship to more interdisciplinary perspectives Each chapter serves as a specific case study on topics ranging from circumpolar exploration and colonial practices deconstructing National Romanticism myths and contemporary artistic responses to the history of the politics of land The book will be of interest to scholars working in art history visual culture nature studies and environmental history **Munch by Himself** Iris Müller-Westermann, Edvard Munch, Royal Academy of Arts (Great

Haarhoff, Walter Peters, 2025-10-16 Tracing the life of architect Hans Heyerdahl Hallen 1930 2022 this book reveals the transnational influences that shaped his practice in South Africa and the migratory circles of ideas that defined a new form of subtropical architecture Beginning with Hallen s Nordic and South African roots chapters then explore his practice and studies at the London County Council and Architectural Association where he met with contemporaries such as Jane Drew and Maxwell Fry From here he returned to South Africa with new ideas that challenged the teachings of early modernism instead combining philosophies such as Norberg Schulz s genius loci with African traditional architecture Zulu Kraal to create buildings unique to local communities and topographical conditions This need to embrace vernacular forms was a response to local climate conditions and local materials but also a desire to make cities relevant to the African context In transmuting European teachings within colonial environments Hallen s practice reveals the role of the architect to reflect local communities and to build for their needs and to create spaces for community and resistance Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects the study features a wealth of previously unpublished archival material to explore the role of the architect in the colonial context *Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971* New York Public
