“

The sun is 400 times larger than the moon but is 400 times further away from Earth, making them appear the same size.

“

A single day on Venus is longer than an entire year on Earth.

“

If you ever stepped on the moon, your footprints would remain there forever.

“

Only half a billionth of the energy released by the sun reaches Earth.

Analog Science Fiction/science Fact John Wood Campbell (Jr.),1974 **Advances in Core Computer**

Science-Based Technologies George A. Tsihrintzis,Maria Virvou,2020-06-18 This book introduces readers to some of the most significant advances in core computer science based technologies At the dawn of the 4th Industrial Revolution the field of computer science based technologies is growing continuously and rapidly and is developing both in itself and in terms of its applications in many other disciplines Written by leading experts and consisting of 18 chapters the book is divided into seven parts 1 Computer Science based Technologies in Education 2 Computer Science based Technologies in Risk Assessment and Readiness 3 Computer Science based Technologies in IoT Blockchains and Electronic Money 4 Computer Science based Technologies in Mobile Computing 5 Computer Science based Technologies in Scheduling and Transportation 6 Computer Science based Technologies in Medicine and Biology and 7 Theoretical Advances in Computer Science with Significant Potential Applications in Technology Featuring an extensive list of bibliographic references at the end of each chapter to help readers probe further into the application areas of interest to them this book is intended for professors researchers scientists engineers and students in computer science related disciplines It is also useful for those from other disciplines wanting to become well versed in some of the latest computer science based technologies **Popular Science**

,1921-08 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Idealization II: Forms and Applications* ,2022-04-19 [Seismic Tomography](#) G.

Nolet,2012-12-06 **Dynamic Travel Choice Models** Huey-Kuo Chen,2012-12-06 This book is the result of several years of research into the modeling and algorithm of problems in dynamic travel choice and related areas Three types of discrete time dynamic travel choice models along with numerical examples are presented i e deterministic stochastic and fuzzy models The notable features pertaining to these models are as follows 1 The asymmetric property of the dynamic link travel time function is clearly verified which leads to a variational inequality formulation 2 The flow propagation constraint is implicitly defined in our model through the incidence relationship between the link inflow and route flow 3 The inflow exit flow and number of vehicles on a link are identified as the three different states over time for the same vehicles under the flow propagation process Therefore only one link variable needs to be used in our dynamic travel choice models This treatment can largely simplify the models complexity and possibly reduce the computation time 4 The developed time space network is consistent with scaling units both in temporal and spatial dimensions 5 The proposed nested diagonalization method takes care of two types of link interactions i e actual link travel times and inflows other than that on the subject time space link 6 The equivalence analysis between a dynamic travel choice model and its corresponding equilibrium condition is performed by proving both the necessary and sufficient conditions under the presumption of equilibrated actual travel times *Air Force*
