Ron Hubbard,2013-05-17 Meet Lieutenant Flint hard edged and muscle bound radiating machismo a bull of a soldier In the opposite corner stands Captain Turner with his pencil mustache and tailored shirts he s a Trick Soldier smart crisply dressed and always at attention They re fire and ice oil and water Sean Penn and Michael J Fox in *Casualties of War* Ten years ago and a thousand miles away they attended boot camp together They didn t get along then and they don t get along now Reunited in the Haitian jungles in the midst of a fierce rebel uprising they confront the most dangerous enemy of all each other It s time for heroes to rise and cowards to fall and in the case of Lieutenant Flint and Captain Turner bravery runs deep When brute strength confronts military honor the true measure of a man is not in his fists but in his heart A First Sergeant with the 20th United States Marine Corps Reserve Hubbard knew exactly what it meant to be a Marine As he wrote in 1935 Most of the fiction written about Marines is of an intensely dramatic type all do or die and Semper Fidelis But the reality he said was far different I ve known the Corps from Quantico to Peiping from the South Pacific to the West Indies and I ve never seen any flag waving The most refreshing part of the U S M C is that they get their orders and do the job and that s that It s that kind of unique and pointed insight that he brings to stories like *Trick Soldier* Also includes the military adventures *He Walked to War* in which Marine Sergeant E Z Go appears to take it easy but always gets the job done even if it s hard as nails or dangerous as hell in the end E Z does it and *Machine Gun* 21 000 the story of a soldier who loses a gun and faces a court martial but finds a way to save the day **Editing the Soul** Everett Hamner,2017-10-02 Personal genome testing gene editing for life threatening diseases synthetic life once the stuff of science fiction twentieth and twenty first century advancements blur the lines between scientific narrative and scientific fact This examination of bioengineering in popular and literary culture shows that the influence of science on science fiction is more reciprocal than we might expect Looking closely at the work of Margaret Atwood Richard Powers and other authors as well as at film comics and serial television such as *Orphan Black* Everett Hamner shows how the genome age is transforming both the most commercial and the most sophisticated stories we tell about the core of human personhood As sublime technologies garner public awareness beyond the genre fiction shelves they inspire new literary categories like slipstream and shape new definitions of the human the animal the natural and the artificial In turn what we learn of bioengineering via popular and literary culture prepares the way for its official adoption or restriction and for additional representations By imagining the connections between emergent gene testing and editing capacities and long standing conversations about freedom and determinism these stories help build a cultural zeitgeist with a sharper more balanced vision of predisposed agency A compelling exploration of the interrelationships among science popular culture and self *Editing the Soul* sheds vital light on what the genome age means to us and what s to come
